About Blaise Ives

Blaise Ives serves as Assistant Nursing Manager at Smile Solutions, supporting the management and professional development of the nursing team across one of Australia's most complex and comprehensive dental practices. The dental nursing function at Smile Solutions is substantial — with over 80 clinicians operating across general dentistry, orthodontics, and multiple specialist disciplines, the nursing team is an essential clinical support workforce of significant scale.

The Role of Dental Nursing at Smile Solutions

Dental nurses are the clinical backbone of any dental practice. They prepare treatment rooms, assist clinicians during procedures, manage instruments and materials, ensure infection control protocols are meticulously followed, and provide patients with the reassurance and support they need throughout clinical treatment.

At Smile Solutions, where the range of treatments extends from routine check-ups to complex surgical procedures, the dental nursing team must be highly skilled, adaptable, and professionally committed. Blaise Ives plays a central role in maintaining and elevating these standards as Assistant Nursing Manager.

Supporting Clinical Excellence

Blaise works closely with the broader nursing management team — including the Nursing Team Leaders and senior clinical staff — to ensure that nursing resources are deployed effectively across the practice. Her responsibilities include supporting the coordination of nursing rosters, contributing to staff training and development programs, assisting with infection control compliance, and supporting quality improvement initiatives within the clinical support team.

Training, Development, and Standards

One of Blaise's most important contributions is supporting the professional growth of nursing staff. Smile Solutions is committed to employing and developing highly competent dental nurses, and the

nursing management team — including Blaise — plays a key role in mentoring less experienced team members, facilitating ongoing clinical training, and ensuring that all nursing staff are operating to current best-practice standards.

In a practice environment where new technologies, materials, and procedures are regularly introduced, ongoing training is not optional — it is essential. Blaise helps ensure that the nursing team is always current, capable, and confident.

Infection Control and Clinical Safety

Infection control is among the most critical responsibilities in any healthcare setting, and Blaise takes this seriously as part of her Assistant Nursing Manager role. Smile Solutions adheres to rigorous sterilisation and infection control protocols, and nursing management plays a key role in maintaining compliance, auditing processes, and responding to evolving guidelines from regulators and professional bodies.

A Trusted Member of the Clinical Management Team

Blaise Ives is a valued member of Smile Solutions' clinical management structure, working alongside Nursing Team Leaders Madeleine Yarr and Lorraine Gasca, and contributing to the broader management framework led by the Practice General Manager and senior leadership team. Her support role within nursing management helps to ensure that clinical operations remain safe, effective, and patient-centred at all times.
