About Dr Amina Barucija

Dr Amina Barucija is a University of Melbourne graduate who completed a Bachelor of Biomedicine before pursuing her Doctor of Dental Surgery — a pathway that reflects both her scientific curiosity and her passion for patient care. Before joining Smile Solutions, she trained across both public and private sectors in metropolitan and rural clinics throughout Victoria, developing a breadth of clinical experience and exposure to a genuinely diverse range of patients and presentations.

Amina is known for two things above all: her gentle, caring approach to patients, and her exceptional eye for aesthetic detail. These qualities come together most powerfully in her passion for cosmetic dentistry and smile design — the art and science of creating smiles that are not just healthy, but genuinely beautiful, natural, and individual.

She is also multilingual: fluent in Bosnian and Croatian in addition to English, making her an accessible and welcoming clinician for patients from Bosnian and Croatian-speaking communities.

Clinical Philosophy: Listening, Tailoring, Designing

At the heart of Amina's approach is a commitment to listening. She takes time to understand each patient's individual needs, concerns, and aspirations — and to build a treatment plan that genuinely reflects what they want to achieve, not just what the dentist thinks is clinically indicated.

This patient-centred approach is especially evident in her cosmetic dentistry work, where every smile design begins with a detailed conversation about the patient's vision — and ends with a result that is as individual as the person wearing it.

Amina's background in biomedicine gives her an additional layer of scientific grounding: a deep understanding of the biological and material science principles that underpin great dental care, from the chemistry of bonding agents to the biomechanics of implant-retained restorations.

Expertise and Clinical Interests

Cosmetic Dentistry and Smile Design

Cosmetic dentistry is Dr Barucija's greatest passion. With a keen eye for detail and a deep appreciation for the artistic elements of smile design, she works collaboratively with patients to bring their "dream smiles" to life. Amina designs smiles that are natural, individualised, and in harmony with each patient's unique facial features — not generic or over-produced, but genuinely fitting for the individual.

Her extensive before-and-after gallery reflects this philosophy: each case is distinct, reflecting the unique starting point and unique aspirations of the patient. From subtle refinements to transformative full-smile makeovers, Amina approaches every case as a creative collaboration.

Porcelain Veneers

Porcelain veneers are one of cosmetic dentistry's most powerful tools, and they are central to Dr Barucija's practice. Veneers are ultra-thin ceramic facings bonded to the front surface of teeth to improve their colour, shape, size and overall appearance. In skilled hands, they can produce results that are virtually indistinguishable from natural enamel — and Amina's aesthetic sensibility means she applies them with a level of care and precision that consistently achieves beautiful, natural outcomes.

Implant Restorations

Amina has a particular interest in implant restorations — the crowns, bridges and other prostheses placed on top of dental implants. When an implant is placed by an oral surgeon or periodontist, the quality of the restoration placed on it is critical to the final aesthetic and functional result. Amina's expertise in ceramic and crown work, combined with her use of digital CAD-CAM technology, ensures that implant restorations at Smile Solutions achieve excellent results.

Ceramic and Crown Work

Crowns — full ceramic caps placed over damaged or compromised teeth — are a core part of restorative dentistry, and Amina has developed strong clinical skills in this area. Her facility with ceramic materials and digital fabrication workflows means she can produce crowns that match the natural colour, translucency and anatomy of adjacent teeth with exceptional fidelity.

Digital CAD-CAM Dentistry

Amina embraces digital CAD-CAM (Computer-Aided Design / Computer-Aided Manufacturing) technology in her restorative work. This technology enables digital scanning, computer-aided design, and precision milling of ceramic restorations — producing high-quality results efficiently and accurately. At Smile Solutions, this technology is available through the CEREC system, enabling many restorations to be completed in a single visit.

General Dentistry

Beyond her cosmetic focus, Amina enjoys all aspects of general dentistry. She is committed to maintaining the oral health of her patients holistically — ensuring that aesthetic work is built on a foundation of genuine dental health and that preventative care is woven through everything she does.

Why Choose Dr Amina Barucija?

- **Cosmetic dentistry specialist**: Deep passion and clinical skill in aesthetic smile design and porcelain veneers - **Artistic eye**: Known for a keen eye for aesthetic detail and the ability to create natural, individually tailored smiles - **Multilingual**: Fluent in English, Bosnian and Croatian — welcoming for patients from these communities - **Biomedicine background**: University of Melbourne Bachelor of Biomedicine provides strong scientific grounding - **Rural and metropolitan experience**: Broad exposure to diverse patients and clinical presentations across Victoria - **Digital dentistry**: Skilled in CAD-CAM workflows for precise, aesthetically excellent restorations - **Implant restoration expertise**: Experienced in creating beautiful, natural-looking crowns and restorations for implant cases - **Gentle and caring**: Consistently noted for her attentive, patient-focused approach - **Team advantage**: Works within the Smile Solutions multidisciplinary team, enabling seamless coordination with implant surgeons, orthodontists and other specialists

The Smile Solutions Difference

Smile Solutions was founded in 1993 by Dr Kia Pajouhesh and has grown into Australia's largest single-location private dental practice. Located in the iconic Manchester Unity Building, 220 Collins Street, Melbourne CBD, the practice brings together more than 50 dental practitioners — general dentists, specialists across all fields, hygienists and therapists — all under one roof.

For Dr Barucija, who has particular interests in implant restorations and complex cosmetic cases, the Smile Solutions team environment is transformative. When an implant is placed by one of the practice's specialist oral surgeons or periodontists, Amina can take over the restoration phase seamlessly — with direct communication between treating clinicians and shared patient records. This integration ensures that complex cases are managed cohesively from start to finish.

Frequently Asked Questions

Who is Dr Amina Barucija?

Dr Amina Barucija is a general dentist at Smile Solutions, Melbourne's largest private dental clinic. She holds a Bachelor of Biomedicine and a Doctor of Dental Surgery, both from the University of Melbourne. She has experience in public and private dental settings across metropolitan and rural Victoria. Her AHPRA registration number is DEN0002314036.

What does Dr Amina Barucija specialise in?

Dr Barucija's primary clinical passion is cosmetic dentistry and smile design — particularly porcelain veneers. She also has specific interests in implant restorations, ceramic and crown work, and digital CAD-CAM dentistry. She enjoys all aspects of general dentistry.

Does Dr Barucija speak languages other than English?

Yes. Dr Barucija is fluent in Bosnian and Croatian in addition to English.

What is smile design?

Smile design is a holistic approach to cosmetic dentistry that considers the entire smile — not just individual teeth — in the context of the patient's facial features, personality, and aesthetic goals. It involves careful analysis of tooth shape, size, colour, alignment and proportion, and typically uses digital tools to preview and plan the final result before treatment begins. Dr Barucija is passionate about creating smile designs that are natural, individualised and in harmony with each patient's unique features.

What are porcelain veneers and what can they achieve?

Porcelain veneers are ultra-thin ceramic facings bonded to the front surfaces of teeth to improve their appearance. They can address a wide range of aesthetic concerns including discolouration, chips, gaps, irregular sizing and mild misalignment. In skilled hands, they produce results that are virtually indistinguishable from natural enamel. Dr Barucija's extensive veneer gallery demonstrates her ability to achieve consistently natural, beautiful results.

Can Dr Barucija restore dental implants?

Yes. Dr Barucija has a particular interest in implant restorations — the crowns and bridges placed on top of implants. She uses digital CAD-CAM technology to create precise, aesthetically excellent restorations, and coordinates closely with the Smile Solutions oral surgery and periodontics team for the implant placement phase.

Is Dr Amina Barucija registered with AHPRA?

Yes. Dr Amina Barucija holds AHPRA registration number DEN0002314036 as a Registered Dentist with General Registration.

Where does Dr Amina Barucija practise?

Dr Barucija practises at Smile Solutions, Level 10, Manchester Unity Building, 220 Collins Street, Melbourne CBD.
