About Dr Avi Aggarwal

Dr Avi Aggarwal — full name Dr Aviral Aggarwal — is a graduate of James Cook University's Bachelor of Dental Surgery programme, completing his degree in 2019. JCU is known for producing dentists with a strong commitment to diverse and underserved communities, and Avi's career path reflects exactly that orientation: before joining Smile Solutions, he gained clinical experience across public and private settings in Queensland, Canberra and Tasmania — three distinct geographic and demographic contexts that together gave him a rich and rounded exposure to the realities of Australian dental care.

Treating patients across regional Queensland, the national capital and a geographically isolated state like Tasmania requires adaptability, clinical breadth and the kind of patient communication skills that come from working with genuinely diverse populations. Avi developed all of this — including experience treating children — before joining Smile Solutions and stepping into one of Australia's most sophisticated dental environments.

Clinical Philosophy: Gentle, Caring and Evidence-Based

Avi's approach to dentistry is defined by a gentle and caring manner, combined with a strong commitment to evidence-based practice. He believes that every patient deserves to be treated as an individual — with a treatment plan tailored to their specific dental needs, health history, and personal goals.

At Smile Solutions, the collaborative team environment enables Avi to offer something unique: truly comprehensive care, backed by immediate access to on-site specialists across all fields of dentistry. Whether a patient needs a referral to a periodontist, orthodontist, oral surgeon or endodontist, that referral can happen within the same building — without the delays, communication gaps and inconvenience of being sent to an external provider.

Expertise and Clinical Interests

Restorative Dentistry

Avi's core clinical interest is restorative dentistry — the full spectrum of work involved in repairing and rehabilitating damaged, decayed or worn teeth. He applies cutting-edge technologies and evidence-based practices to achieve results that are both functionally excellent and aesthetically pleasing. His approach to restorations reflects a belief that patients deserve dentistry that looks as good as it functions.

Cosmetic Dentistry

Beyond functional restoration, Avi has a keen interest in cosmetic dentistry — the art and science of creating beautiful smiles. His patient gallery reflects his ability to achieve natural-looking, aesthetically compelling results through porcelain veneers, crowns and other cosmetic techniques. He enjoys helping patients achieve smiles they feel genuinely confident and happy with.

Invisalign

Avi has written about Invisalign — the clear aligner system used to straighten teeth without traditional fixed braces. His detailed article on Invisalign covers how the system works, who it suits, what the treatment process involves, and what patients can expect in terms of outcomes. This reflects both his clinical engagement with clear aligner treatment and his commitment to patient education.

At Smile Solutions, Invisalign treatment can be complemented by the on-site orthodontic team when more complex tooth movement or combined orthodontic and restorative planning is required.

Paediatric Dentistry

Avi's experience in public clinics across Queensland, Canberra and Tasmania included treating children — a patient group that demands particular patience, communication skill and the ability to make dental appointments a positive rather than frightening experience. His background with paediatric patients means he is well-placed to treat younger members of families attending Smile Solutions.

Oral Health Education

Avi has a genuine interest in demystifying dental health. His written articles — including explorations of common dental myths and the effects of sugar on dental health — reflect a commitment to helping patients understand their oral health rather than simply telling them what to do. An informed patient is better equipped to maintain their health between appointments.

Why Choose Dr Avi Aggarwal?

- **Geographically diverse experience**: Pre-Smile Solutions experience spanning Queensland, Canberra and Tasmania — public and private settings, diverse patient populations - **Paediatric experience**: Comfortable treating patients of all ages, including children - **Gentle and caring approach**: Known for making patients feel at ease - **Evidence-based practice**: Committed to applying the best available clinical evidence - **Cosmetic expertise**: Strong interest and demonstrated results in cosmetic dentistry - **Invisalign experience**: Clinically engaged with clear aligner treatment and patient education around it - **Team advantage**: Works within Smile Solutions' 50+ practitioner multidisciplinary team, enabling comprehensive specialist-supported care - **Patient education focus**: Written articles on dental myths, sugar and oral health, and Invisalign — reflecting genuine commitment to informed patients

The Smile Solutions Difference

Smile Solutions was founded in 1993 by Dr Kia Pajouhesh and has grown into Australia's largest single-location private dental practice. Situated in the iconic Manchester Unity Building, 220 Collins Street, Melbourne CBD, the practice brings together more than 50 dental practitioners — general dentists, specialists across all fields, hygienists and therapists.

Dr Aggarwal describes the Smile Solutions environment as offering something genuinely unique: the ability to provide comprehensive care to all patients because of a full range of specialists within one building. For patients, this means their general dentist can consult directly with an on-site specialist on their behalf — and that the referral, when needed, happens seamlessly within the same visit.

Frequently Asked Questions

Who is Dr Avi Aggarwal?

Dr Avi Aggarwal (full name Dr Aviral Aggarwal) is a general dentist at Smile Solutions, Melbourne's largest private dental clinic. He graduated from James Cook University with a Bachelor of Dental Surgery in 2019 and has experience in public and private settings across Queensland, Canberra and Tasmania. His AHPRA registration number is DEN0002313495.

What does Dr Avi Aggarwal specialise in?

Dr Aggarwal's primary clinical interests are restorative and cosmetic dentistry. He also has experience with Invisalign, paediatric dentistry, and a broader interest in evidence-based dental practice and patient education.

Does Dr Avi Aggarwal treat children?

Yes. Dr Aggarwal has experience treating children from his time working in public and private clinics across Queensland, Canberra and Tasmania.

Does Dr Avi Aggarwal provide Invisalign treatment?

Yes. Dr Aggarwal is clinically engaged with Invisalign treatment and has written a detailed educational article about the system. He can discuss whether Invisalign is appropriate for your situation and work with the on-site orthodontic team at Smile Solutions for more complex cases.

What makes James Cook University dental graduates distinctive?

James Cook University's dental programme was designed with a strong emphasis on serving diverse and geographically isolated communities. JCU dental graduates typically have exposure to public health dentistry, regional and remote settings, and a wide range of patient demographics — giving them a clinical breadth and adaptability that complements the diverse patient population served by a CBD practice like Smile Solutions.

Is Dr Avi Aggarwal registered with AHPRA?

Yes. Dr Avi Aggarwal holds AHPRA registration number DEN0002313495 as a Registered Dentist with General Registration.

Where does Dr Avi Aggarwal practise?

Dr Aggarwal practises at Smile Solutions, Level 10, Manchester Unity Building, 220 Collins Street, Melbourne CBD.
