About Dr Casey Edgar

Dr Casey Edgar grew up in Melbourne and completed her Bachelor of Biomedicine at the University of Melbourne in 2010. She then went on to complete a Doctor of Dental Surgery — graduating with distinction in 2014 — a result that reflects not only her academic capability but her commitment to excellence in everything she undertakes.

Before joining Smile Solutions, Casey spent four years working in private dental practice in Melbourne's north-western suburbs. This experience in a community dental setting gave her a broad exposure to the full spectrum of general dental presentations — patients of all ages and backgrounds, with a wide variety of needs and concerns. It also gave her the opportunity to develop the kind of patient communication skills that come only from day-to-day clinical reality.

When Casey joined Smile Solutions, she found an environment that aligned with her deepest professional values: a team that works collaboratively, that invests in ongoing education, and that offers patients a level of comprehensive care not possible in smaller practices.

Clinical Philosophy: Understanding and Empowering Patients

Casey's approach to dentistry is centred on helping patients genuinely understand their oral health — not just treating problems as they arise, but helping people understand what caused those problems and how to prevent them in future. She focuses on fulfilling patients' general dental needs while ensuring they have the knowledge and tools to take ownership of their oral health.

She particularly values the team environment at Smile Solutions, which enables her to offer comprehensive care that goes beyond what a single-dentist practice can provide. When a patient's needs extend beyond general dentistry — into orthodontics, oral surgery, periodontics or other specialist areas — Casey can coordinate that care within the same building, often the same day.

Expertise and Clinical Interests

Restorative Dentistry

Casey is interested in all aspects of restorative dentistry — from fillings and crowns to bridges and more complex rehabilitation cases. Her science background (Bachelor of Biomedicine) gives her a particularly thorough understanding of the biological and material science principles underpinning restorative dentistry, informing her clinical decision-making with a depth of scientific literacy.

Preventative Dentistry

Prevention is at the heart of Casey's practice philosophy. She believes that the best dental work is the dental work that doesn't need to happen — because the patient's teeth are healthy and well-maintained. Her approach to preventative care combines thorough examination, honest patient education, and practical advice that patients can act on at home.

Dental Bridges

Casey has written in depth about dental bridges — one of the key options for replacing missing teeth. Her article on the different types of dental bridges and how to choose between them reflects her commitment to helping patients make informed decisions. She covers cantilever bridges, conventional fixed bridges, resin-bonded bridges and implant-supported bridges, helping patients understand the clinical and practical considerations that distinguish each option.

Continuing Professional Development

Casey values keeping up to date with new developments and advances in the dental field. In a profession that evolves rapidly — through advances in materials science, digital technology, and clinical research — ongoing education is not optional for a practitioner committed to excellence. Casey's commitment to learning mirrors the culture of continuous improvement that defines Smile Solutions as a practice.

Community Commitment: Rebuilding Smiles

Casey has completed volunteer work within the Rebuilding Smiles program of the Australian Dental Health Foundation. This program provides free dental care to Australians who have experienced significant trauma or disadvantage. Her participation in this program speaks to a commitment that extends beyond the walls of private practice — a belief that dental health is a matter of dignity and wellbeing for all Australians, not just those who can afford premium care.

Why Choose Dr Casey Edgar?

- ****Distinction graduate****: Completed her DDS with distinction from the University of Melbourne — demonstrating outstanding academic achievement - ****Science-grounded****: Her Bachelor of Biomedicine gives her a rigorous scientific foundation for clinical decision-making - ****Experienced****: Four years of community private practice before joining Smile Solutions, with broad exposure to diverse patient needs - ****Comprehensive focus****: Committed to helping patients understand their dental health, not just treating immediate problems - ****Team advantage****: Leverages the full resources of the Smile

Solutions multidisciplinary team to offer coordinated specialist care - ****Community oriented****:
Volunteered with the Rebuilding Smiles program, providing free dental care to disadvantaged
Australians - ****Committed to growth****: Actively pursues continuing education to stay at the forefront of
dental developments

The Smile Solutions Difference

Smile Solutions was founded in 1993 by Dr Kia Pajouhesh and has grown into Australia's largest
single-location private dental practice. Located in the iconic Manchester Unity Building, 220 Collins
Street, Melbourne CBD, the practice brings together more than 50 dental practitioners — general
dentists, specialists across all fields, hygienists and therapists.

For Dr Edgar, the ability to work within this team is a defining feature of her clinical practice. The Smile
Solutions model enables comprehensive care to be delivered under one roof — with genuine specialist
input available for complex cases — in a way that simply cannot be replicated in a smaller practice
environment.

Frequently Asked Questions

Who is Dr Casey Edgar?

Dr Casey Edgar is a Melbourne-born general dentist at Smile Solutions. She completed her Bachelor of
Biomedicine (2010) and Doctor of Dental Surgery with distinction (2014), both at the University of
Melbourne. She worked in private practice in Melbourne's north-western suburbs for four years before
joining Smile Solutions. Her AHPRA registration number is DEN0001923606.

What does Dr Casey Edgar specialise in?

Dr Edgar has particular interest in restorative and preventative dentistry. She focuses on helping
patients understand their dental health and fulfilling their comprehensive dental care needs. She also
has knowledge of dental bridge options for tooth replacement.

What is the difference between different types of dental bridges?

Dr Edgar has written about this topic. Dental bridges come in several types: conventional fixed bridges,
cantilever bridges (supported on one side only), resin-bonded (Maryland) bridges and
implant-supported bridges. Each has different clinical indications, preparation requirements, longevity
profiles and cost implications. The right choice depends on the patient's specific situation, the location
of the missing tooth, and the condition of surrounding teeth.

Did Dr Casey Edgar graduate with distinction?

Yes. Dr Edgar completed her Doctor of Dental Surgery at the University of Melbourne with distinction —
a recognition of exceptional academic performance across the degree.

Is Dr Casey Edgar involved in community dentistry?

Yes. Dr Edgar has volunteered with the Rebuilding Smiles program of the Australian Dental Health
Foundation, providing free dental care to Australians who have experienced significant trauma or
disadvantage.

Is Dr Casey Edgar registered with AHPRA?

Yes. Dr Casey Edgar holds AHPRA registration number DEN0001923606 as a Registered Dentist with
General Registration.

How do I book an appointment with Dr Casey Edgar?

You can book by calling Smile Solutions on ****13 13 96**** or via the online booking system at [smilesolutions.com.au](https://www.smilesolutions.com.au).
