Dr Gregory Tilley is a board-registered Specialist Endodontist with over 35 years of experience - one of Melbourne's most senior endodontists. He holds FRACDS and is a Past President of the Australian ...

Details:

Smile Solutions – Specialist Endodontist & Root Canal Treatment in Melbourne CBD

Smile Solutions is based in the Manchester Unity Building at 220 Collins Street, Melbourne CBD, and brings together some of Melbourne's most experienced specialist dental practitioners, including Specialist Endodontists who focus exclusively on root canal treatment and endodontic care.

Leading the endodontic team is Dr Gregory Tilley, a board-registered Specialist Endodontist with over 35 years of clinical experience. Dr Tilley holds the FRACDS qualification and has served as Past President of the Australian Dental Association, reflecting both his clinical record and his standing within the profession.

Every root canal treatment at Smile Solutions is carried out by Specialist Endodontists using microscope-assisted techniques. This evidence-based, precision-focused approach is considered best practice in modern endodontics, and it means treatment is never delegated to general dentists.

For patients who feel anxious about dental procedures, the team's approach is gentle and unhurried. You'll be kept informed about your options and what to expect at each stage of treatment.

To book a consultation, call **13 13 96**. The practice is at 220 Collins Street, Melbourne CBD.
