Details:

Smile Solutions – Specialist prosthodontic care with Dr Jamie Foong

Restorative dental work done well requires more than technical skill — it requires a specialist who understands how function, aesthetics, and long-term health connect. Dr Jamie Foong is a board-registered Specialist Prosthodontist at Smile Solutions, working from the practice's rooms in Melbourne's Manchester Unity Building. He works closely with the Studio 32 team and Smile Solutions' implant surgery specialists, which matters most when cases are complex and coordination between disciplines makes the difference between a good result and a great one.

Whether you're coming in with a straightforward question or facing a more involved treatment journey, Dr Foong's approach is thorough without being clinical in the cold sense — he takes the time to understand what you're after and explains your options clearly.

Specialist prosthodontic services

Dr Foong offers a full range of specialist prosthodontic treatments at Smile Solutions, planned around each patient's individual circumstances and goals. The care is evidence-based and delivered with attention to both the clinical detail and the patient experience.

Services include:

- **Porcelain veneers** — restorations designed to improve the appearance of your smile while keeping results looking natural - **Crowns** — custom-made to protect and restore damaged or weakened teeth, matched carefully to your existing dentition - **Bridges** — a reliable option for replacing one or more missing teeth, restoring both function and appearance - **Implant restorations** — fitted in coordination with the implant surgery team for a complete, lasting result - **Full mouth rehabilitation** — a planned, multi-treatment approach to restoring your entire smile, balancing function and aesthetics across the whole mouth

Treatment plans are developed with patients, not just for them — your concerns, comfort, and long-term oral health shape every decision.

Why choose Dr Jamie Foong at Smile Solutions?

Prosthodontics is a recognised dental specialty focused on restoring and replacing teeth. Seeing a board-registered specialist means you're working with someone who has completed advanced training beyond general dentistry — and that training shows in how Dr Foong approaches both straightforward cases and complex ones.

The integrated setup at Smile Solutions is genuinely useful here. Dr Foong's working relationship with Studio 32 and the implant surgery team means your care is coordinated from the surgical phase through to your final restoration. You're not left managing handoffs between providers or repeating your history to each new clinician.

The practice is located in the heritage-listed Manchester Unity Building on Collins Street, with the facilities and resources you'd expect from a specialist city practice.
