Details:

Smile Solutions – Dr Katie Xu, Specialist Orthodontist

Good orthodontic care comes down to experience and the person delivering it. Dr Katie Xu is a board-registered Specialist Orthodontist at Smile Solutions and Collins Street Orthodontics, known for bringing genuine clinical skill and a calm, caring manner to every patient she treats.

She's part of the Smile Solutions team that holds Australia's first Invisalign Blue Diamond status, with more than 9,000 cases completed. That case volume matters — it means the team has worked through a wide range of clinical situations, so whatever your teeth are doing, they've likely seen it before.

Personalised orthodontic care, right in the heart of Melbourne

Dr Xu consults at the Manchester Unity Building, 220 Collins Street — one of Melbourne's most recognised heritage buildings. Whether you're weighing up your options or ready to get started, she and the Smile Solutions team will map out a treatment plan built around your specific situation, not a one-size-fits-all approach.

Services offered

Dr Katie Xu treats patients across all age groups, offering:

- **Invisalign** – Clear aligner therapy delivered by one of Australia's most experienced Invisalign teams - **Braces** – Fixed orthodontic treatment with modern appliances - **Early intervention orthodontics** – Evidence-based care for younger patients, focused on supporting healthy dental development before problems become harder to correct
