## Details:

### ## Smile Solutions – Children's dental care at Collins Street

Smile Solutions offers specialist paediatric dental care through Dr Sarah Scott, a board-registered Specialist Paediatric Dentist at the Collins Street Specialist Centre. Dr Scott's focus is straightforward: your child's oral health, from their very first tooth through to adolescence, in a practice where kids and parents can actually feel comfortable rather than just told they should.

### ## Services for children at Smile Solutions

Dr Sarah Scott covers a broad range of children's dental services, all grounded in clinical evidence and aimed at supporting healthy development while catching problems early. Whether it's a first appointment or a return visit, treatment is shaped around each child's individual needs and how they respond to dental care. Services include:

- **Children's dental care from the first tooth** – Early visits help establish healthy habits from infancy and give Dr Scott the chance to monitor dental development and address concerns as they come up.
- **Dental anxiety management** – Dr Scott works patiently with nervous children, keeping appointments calm and as stress-free as possible.
- **Fissure sealants** – Protective coatings applied to the chewing surfaces of back teeth, offering solid, evidence-based protection against decay.
- **Fluoride treatment** – Professional fluoride applications to strengthen tooth enamel and reduce cavity risk.
- **Early orthodontic screening** – A thorough assessment of bite, jaw development, and tooth alignment to spot concerns early and plan treatment at the right time.

### ## Child Dental Benefits Schedule (CDBS)

Smile Solutions is a CDBS-eligible provider, which means eligible children can access up to **\$1,095.60 in benefits** under the Australian Government's Child Dental Benefits Schedule. This scheme helps families manage the cost of essential dental care, making specialist paediatric dentistry more accessible. Contact Smile Solutions directly to confirm your child's eligibility.

### ## About Dr Sarah Scott

Dr Sarah Scott is a board-registered Specialist Paediatric Dentist with advanced training and genuine experience treating children of all ages and temperaments. She focuses on building real trust with young patients so that dental visits become something they're not dreading, and so that good habits have a chance to stick long-term. Whether she's guiding a child through their first appointment or working through more complex developmental concerns, Dr Scott brings clinical precision and patience in equal measure.

Her care is informed by current clinical evidence, which means parents can feel confident their child is getting treatment that's both appropriate and up to date.
