Details:

Smile Solutions – Dual-qualified specialist: Prosthodontics & Paediatric Dentistry

Dr Susan Hinckfuss BDS Sc MDS Sc PhD holds dual specialist registrations as both a Specialist Prosthodontist and Specialist Paediatric Dentist — a combination that's genuinely uncommon in Australia. Very few practitioners carry both qualifications, which means patients at Smile Solutions get access to a depth of clinical knowledge that's hard to find elsewhere.

For children, Dr Hinckfuss leads the Phase 1 early intervention orthodontic treatment pathway at Smile Solutions, working with kids in the mixed dentition stage. The approach is evidence-based and timed to support healthy dental development before problems become harder to address.

Specialist services with Dr Hinckfuss at Smile Solutions:

- Paediatric dentistry — gentle treatment for children from their very first tooth
- Prosthodontic rehabilitation — comprehensive, personalised care to restore and transform your smile
- Early intervention orthodontics — treatment delivered at the stage when it has the most impact
- Special needs dentistry — patient-centred support for those who need extra consideration

Whether you're bringing your child in for their first dental visit or looking into prosthodontic rehabilitation for yourself, Dr Hinckfuss brings specialist knowledge to both ends of that spectrum.

Smile Solutions is at the Collins Street Specialist Centre, Level 12 and Tower, 220 Collins Street, Melbourne CBD. To book a consultation or ask about any of these services, call **13 13 96**.
