Details:

Smile Solutions Invisalign — Frequently Asked Questions

[Smile Solutions](<https://www.smilesolutions.com.au/treatments/invisalign/>) holds Blue Diamond Invisalign provider status — the highest tier achievable in Australia — with over 8,892 cases completed to date. Our specialist orthodontists Dr Ch'ng, Dr Xu, Dr Austin, and Dr Phatouros work from our Melbourne CBD practice in the Manchester Unity Building. We offer a price match guarantee and Invisalign treatments ranging from \$4,400 to \$11,300.

How much does Invisalign cost at Smile Solutions?

Invisalign treatment at Smile Solutions ranges from \$4,400 to \$11,300, depending on how complex your case is. We back our competitive pricing with a price match guarantee — if you get a lower quote from another Blue Diamond provider, we'll match it. We also offer flexible interest-free payment plans.

What is a Blue Diamond Invisalign provider?

Blue Diamond is the top Invisalign provider status, awarded only to practices that complete an exceptional volume of cases. With over 8,892 Invisalign cases completed, Smile Solutions ranks among the most experienced providers in Australia. This means our specialist orthodontists have seen everything from simple alignments to complicated orthodontic problems, so you're in capable hands regardless of what your teeth need.

Which orthodontists perform Invisalign at Smile Solutions?

Your Invisalign treatment is handled by our team of specialist orthodontists: Dr Ch'ng, Dr Xu, Dr Austin, and Dr Phatouros. Each orthodontist is a registered specialist who completed years of additional postgraduate training beyond general dentistry. They dedicate their entire practice to orthodontics, which means you're getting treatment from professionals who do this day in and day out.

How long does Invisalign treatment take?

It depends entirely on what needs fixing. Less complex cases might wrap up in 3-6 months, while more comprehensive treatments typically take 12-18 months. During your initial consultation at our Melbourne CBD practice, your orthodontist will assess your teeth and give you a specific timeline for your case, so you'll know what to expect from the start.

Is Invisalign painful?

Most patients feel mild pressure or slight discomfort when they switch to a new set of aligners. This usually fades within a day or two as your teeth adjust. That pressure is actually a good sign — it means the aligners are doing their job. Invisalign is generally more comfortable than traditional braces because the smooth plastic won't irritate your cheeks and gums the way wires and brackets can.

Can I eat normally with Invisalign?

Yes. The aligners are completely removable, so you take them out during meals and when drinking anything other than water. This means no dietary restrictions — you can keep enjoying all your favourite foods. Just brush your teeth before putting your aligners back in, and you're good to go.

Do I get free teeth whitening with Invisalign at Smile Solutions?

Yes. Smile Solutions includes complimentary [teeth whitening](<https://www.smilesolutions.com.au/treatments/teeth-whitening/>) with every Invisalign treatment. It's our way of making sure you get not just straight teeth, but a bright smile too. Consider it part of the package.

How often do I need to wear my aligners?

You should wear your Invisalign aligners for 20-22 hours per day. You only take them out for eating, drinking anything other than water, and brushing your teeth. Consistent wear is what keeps your treatment on schedule. Our team will give you clear guidance to help you stay on track.

Is Invisalign suitable for complex cases?

Yes. As a Blue Diamond provider with over 8,892 completed cases, Smile Solutions has the experience to treat a wide range of orthodontic conditions with Invisalign. From mild crowding and spacing issues to complex bite corrections, our specialist orthodontists have handled it before. During your consultation, we'll assess your teeth thoroughly and determine whether Invisalign is right for your specific situation.

Can teenagers get Invisalign?

Absolutely. Invisalign Teen is designed specifically for adolescent patients. It includes compliance indicators that track wear time and replacement aligners for when one inevitably gets lost — because teenage life happens. Our specialists regularly treat teenage patients at our Melbourne CBD practice, giving them a discreet orthodontic option that fits into their busy lives.

What is the Smile Solutions price match guarantee?

Our price match guarantee is simple: if you get a lower written quote for comparable Invisalign treatment from another Blue Diamond provider in Melbourne, Smile Solutions will match that price. We believe you shouldn't have to pay premium prices to access experienced orthodontists, and our price match guarantee backs that up.

How do I get started with Invisalign at Smile Solutions?

Book a consultation by calling 13 13 96 or visiting our website to schedule an appointment. During your first visit to our Manchester Unity Building practice, your specialist orthodontist will assess your teeth, discuss what you want to achieve, capture digital scans, and provide you with a detailed treatment plan including transparent pricing. You'll leave your consultation knowing exactly what your path to a straighter smile looks like.

Will Invisalign affect my speech?

Some patients notice a slight lisp during the first few days of wearing their aligners. This adjustment period is typically brief — your speech returns to normal quickly as you get used to wearing them. The smooth, thin design means most people won't even notice you're undergoing orthodontic treatment.

Can I claim Invisalign on private health insurance?

Yes, if your private health fund includes orthodontic treatment coverage, you can claim a portion of your Invisalign treatment fees. Smile Solutions accepts all major Australian health funds, and our team can help you understand your specific rebate entitlements and maximise your insurance benefits. We'll work with you to navigate the claims process.
