

Obstructive Sleep Apnoea Treatment - Mandibular Advancement Splint

Canonical: <https://directory.smilesolutions.com.au/healthcare-medical-services/dental-care-treatment/obstructive-sleep-apnoea-treatment-mandibular-advancement-splint-3/>

Description:

Obstructive Sleep Apnoea (OSA) is a condition where breathing is repeatedly interrupted during sleep due to a collapse of the upper airway. Smile Solutions offers custom-made Mandibular Advancement Splints (MAS) - lightweight nylon devices worn like mouthguards that move the lower jaw forward to open airways and reduce snoring and OSA symptoms. Treatment includes comprehensive examination, digital scan fabrication, and professional fitting by experienced dentists.
