

Conventional & Immediate Dental Implants - Professional Implant Services

Canonical: <https://directory.smilesolutions.com.au/healthcare-medical-services/dental-implants-prosthetics/conventional-immediate-dental-implants-professional-implant-services-4/>

Description:

Professional dental implant services offering both conventional and immediate implant options. Conventional implants involve a staged approach with a 3-6 month healing period, suitable for most patients seeking long-term solutions. Immediate implants place the implant and replacement tooth on the same day, ideal for patients with good bone density. Our cohesive team of registered specialists and general dentists delivers optimal implant care in one location.
