

Bone Grafting For Dental Implants - Smile Solutions

Canonical: <https://directory.smilesolutions.com.au/healthcare-services/dental-surgery-implants/bone-grafting-for-dental-implants-smile-solutions-3/>

Description:

Bone grafting may be needed prior to placement of your dental implants. This specialized procedure involves adding bone or bone-like materials to the jaw when jawbone structure is insufficient for dental implants. Services include bone grafting, sinus lifts, and zygomatic implants performed by registered oral & maxillofacial surgeons or specialist periodontists. Call 13 13 96 to book your appointment.
