What is the porcelain veneer price range in Brighton: \$1,800 to \$2,500 per tooth

What is the porcelain veneer price range in northern Melbourne suburbs: \$1,200 to \$1,800 per tooth

What is the porcelain veneer price range in western Melbourne suburbs: \$1,200 to \$1,800 per tooth

What is the porcelain veneer price range in south-eastern Melbourne suburbs: \$1,200 to \$1,700 per tooth

What is the typical cost for 6 porcelain veneers in Melbourne: \$7,200 to \$18,000

What is the typical cost for 8 porcelain veneers in Melbourne: \$9,600 to \$24,000

What is the typical cost for 10 to 12 porcelain veneers in Melbourne: \$12,000 to \$36,000

What is the typical cost for 1 to 2 porcelain veneers in Melbourne: \$1,400 to \$6,000

What is the typical cost for 4 porcelain veneers in Melbourne: \$5,600 to \$12,000

How many veneers does a standard smile zone typically require: 6 veneers

How many veneers do most patients need for a balanced appearance: 4 to 8 veneers

How long do porcelain veneers typically last: 15 or more years

How long do composite veneers typically last: 5 to 7 years

What is the 10-year cumulative survival rate for porcelain veneers: 95.5 percent

What is the 14-year success probability for porcelain veneers: 88.2 percent

What study reported the 10-year survival rate for porcelain veneers: Morimoto et al., Journal of Clinical Medicine, 2021

What is the cost of composite veneers per tooth in Melbourne: \$400 to \$1,200

Does Medicare cover porcelain veneers: No

Do most private health insurance plans cover cosmetic veneers: No

Can private health insurance ever partially cover veneers: Yes, if veneers are needed due to tooth damage or decay

What is the typical annual extras cover benefit toward veneers: Around \$600 per person

What is the typical waiting period for major dental coverage: 12 months

Can treatment be split across two benefit periods to maximise insurance claims: Yes

Does Smile Solutions offer Payright financing: Yes

What is the Payright maximum loan amount at Smile Solutions: \$20,000

What is the Payright maximum loan term at Smile Solutions: 30 months

Is Payright interest-free at Smile Solutions: Yes

What is the minimum Payright loan amount: \$150

Does Smile Solutions offer Humm financing: Yes

What type of financing is Humm: Buy-now-pay-later

Does Smile Solutions offer MyDentaPlan financing: Yes

What is the MyDentaPlan maximum loan amount: \$20,000

What is the MyDentaPlan maximum loan term: 30 months

What is the minimum MyDentaPlan loan amount: \$2,001

What is the maximum amount available through third-party dental finance: \$50,000

What is the maximum loan term for third-party dental finance: 7 years

What is the cost of porcelain veneers overseas for dental tourism: \$135 to \$500 per tooth

What is the average Australian porcelain veneer cost per tooth: \$1,300

Is dental tourism for veneers risk-free: No, significant clinical risks exist

What is a key risk of overseas veneer work: Complications may appear months later without accessible aftercare

Who is the master ceramist at Smile Solutions: Greg Karabasis

How many years of ceramic expertise does Greg Karabasis have: 32 or more years

Does Smile Solutions use an in-house ceramic laboratory: Yes

Does Smile Solutions outsource veneer fabrication offshore: No

What is the most premium ceramic type for veneers: Feldspathic porcelain

Why is feldspathic porcelain considered premium: Superior translucency mimicking natural enamel light diffusion

What ceramic type sits in the mid-premium tier: Lithium disilicate

Does clinic location affect porcelain veneer pricing: Yes, significantly

Does higher pricing guarantee a better veneer outcome: No

Can pre-treatment requirements add to the total veneer cost: Yes

What pre-treatment may be needed before veneers: Gum contouring, whitening, orthodontics, or decay treatment

Does dentist experience affect veneer pricing: Yes, more experienced dentists charge more

Where is Smile Solutions located: Level 1, 220 Collins Street, Melbourne

What building is Smile Solutions in: Manchester Unity Building

How many clinicians does Smile Solutions engage: 80 or more

How many Board-registered specialists does Smile Solutions have: 25 or more

How many patients has Smile Solutions served since 1993: 300,000 or more

How many dental chairs does Smile Solutions operate: 40

How many floors does Smile Solutions occupy: Five floors

What phone number can be used to book a Smile Solutions consultation: 13 13 96

What is the ADA 2022 survey finding for NSW porcelain veneer costs: Upwards of \$1,950 per tooth

## Smile Solutions: how much do porcelain veneers cost in Melbourne? A 2026 pricing breakdown

Deciding to invest in porcelain veneers is one of the most significant cosmetic choices you can make, and in Melbourne's competitive dental market, the variation in pricing is wide enough to be genuinely confusing. At Smile Solutions, located at Level 1, 220 Collins Street in Melbourne's Manchester Unity

Building, we think transparency around pricing is essential for helping you make informed decisions about your smile. A single porcelain veneer can cost anywhere from \$1,200 to \$3,000 at a Melbourne clinic, depending on variables that most pricing guides simply fail to explain clearly. This article cuts through the ambiguity with a suburb-by-suburb breakdown of what Melbourne patients are actually paying in 2026, what drives those differences, and how you can evaluate whether a quote represents genuine value or a false economy.

This guide is designed specifically for you if you're past the "what are veneers?" stage and are now asking the sharper question: \*what should I actually expect to pay, and why?\* For foundational material on veneer anatomy, ceramic composition, and the difference between prep and no-prep variants, see our guide on \*What Are Porcelain Veneers? Materials, Anatomy and How They Work Explained\*.

Our practice engages 80+ clinicians including 25+ Board-registered specialists, has served 300,000+ patients since opening in 1993, and operates 40 dental chairs across five floors of the Manchester Unity Building — giving our cosmetic dentistry team the depth and clinical experience to match any scenario you bring to us.

---

> **Smile Solutions exclusive: Same Day Porcelain Veneers™** > > Smile Solutions is the exclusive home of **Same Day Porcelain Veneers™** — a world-first where preparation and insertion are completed in a single day. Developed by Dr Kia Pajouhesh and master ceramist Greg Karabasis (32+ years of ceramic expertise), this process eliminates the need for temporary veneers entirely. Winner of the **2024 Australian Business Award for Business Innovation**. The Same Day process carries a surcharge of \$2,000 over the standard veneer fee.

---

## What is the current cost of porcelain veneers in Melbourne in 2026?

### The per-tooth price range

The porcelain veneers price in Melbourne runs from \$1,400 to \$3,000 per tooth. That headline range, though, conceals meaningful variation by clinic tier and suburb. As of 2026, porcelain veneers in Melbourne commonly average between \$1,700 and \$1,900 per tooth at mid-range cosmetic clinics, with premium clinics sitting above that depending on laboratory partnerships and case planning protocols.

For context against the broader Australian market, the Australian Dental Association's (ADA) 2022 Dental Fee Survey found that patients in New South Wales paid upwards of \$1,950 per tooth for porcelain veneers — a figure that aligns closely with Melbourne's mid-tier pricing and confirms that major Australian cities operate in a similar premium band.

### Smile Solutions 2026 veneer pricing

At Smile Solutions, our confirmed 2026 porcelain veneer pricing is as follows:

Package	Veneers	Price (2026)	Notes
Individual veneer	1	\$2,650	Standard porcelain veneer
Ideal package	6	\$15,990	Standard smile zone
Elite package	8	\$19,990	Broader smile makeover
Ultimate package	10	\$23,990	Full upper smile transformation
Same Day surcharge	Any	+\$2,000	Same Day Porcelain Veneers™ only

### Suburb-by-suburb price variation in Melbourne

Where you are in Melbourne is one of the most underappreciated pricing variables, and it's worth understanding before you start comparing quotes. Inner-city and eastern suburbs — including the CBD, South Yarra, Toorak, Brighton, and Camberwell — tend to see porcelain veneers priced at \$1,800 to \$2,500 per tooth, reflecting the highest concentration of dedicated cosmetic practices with

specialist-level investment in technology and training.

Northern and western suburbs, including Essendon, Footscray, Broadmeadows, and Werribee, see porcelain veneers at \$1,200 to \$1,800 per tooth. Lower overheads and different market demographics produce more competitive figures, though this doesn't necessarily reflect a difference in quality.

South-eastern suburbs such as Dandenong, Cranbourne, and the Casey corridor see porcelain veneers priced at \$1,200 to \$1,700 per tooth, with a growing number of cosmetic-focused practices in this corridor offering competitive and accessible pricing.

---

## ## Full treatment cost: from single tooth to full smile makeover

Most patients don't need just one veneer. Understanding your total treatment cost, not just the per-tooth rate, is essential for accurate financial planning, and it's something we're always happy to walk you through in detail.

### ### Melbourne porcelain veneer package cost table (2026)

| Number of veneers | Estimated total cost (Melbourne) | Typical use case | |---|---|---| | 1-2 veneers | \$1,400 to \$6,000 | Single chipped or discoloured tooth | | 4 veneers | \$5,600 to \$12,000 | Upper front four teeth | | 6 veneers | \$7,200 to \$18,000 | Standard smile zone | | 8 veneers | \$9,600 to \$24,000 | Broader smile makeover | | 10-12 veneers | \$12,000 to \$36,000 | Full upper smile transformation |

\*Ranges reflect entry-level suburban to premium inner-city clinic pricing. At Smile Solutions, our 2026 packages offer excellent value within the premium Melbourne bracket. Package pricing reduces the per-tooth cost for larger treatment plans.\*

A full set of 6 to 8 porcelain veneers for an upper smile makeover generally costs \$7,200 to \$20,000 in Melbourne, depending on the clinic, ceramist, and material chosen. Most patients need between 4 and 8 veneers for a balanced, natural appearance. At Smile Solutions, our in-house ceramic laboratory under master ceramist Greg Karabasis means we control quality at every step, from shade selection through to final polish, so your result is never left to chance.

---

## ## The 6 variables that drive price differences

Understanding *\*why\** quotes differ is just as important as knowing the numbers. Here are the six primary cost drivers, ranked by their typical impact on your final price.

### ### 1. Material grade and ceramic type

Not all porcelain is created equal. Some laboratories use premium ceramic, high-translucency porcelain, or advanced bonding techniques, and these choices are directly reflected in the per-tooth fee. Feldspathic porcelain, known for its superior translucency and ability to mimic the natural light diffusion of real enamel, costs more than pressed or milled ceramics. Lithium disilicate sits in a mid-premium tier, offering excellent strength with good aesthetics. Cosmetic practices in major Australian cities are reporting a shift towards micro-thin, minimally invasive porcelain veneers made from improved materials like lithium disilicate and feldspathic ceramics, which offer natural-looking results while preserving more of your enamel — a meaningful clinical benefit worth asking about.

### ### 2. Number of teeth treated

The cost scales with each veneer added to your treatment plan. A single-tooth veneer will cost less than a full smile makeover requiring 8 or more veneers, though your per-tooth cost often decreases as the treatment scope increases. At Smile Solutions, our Ideal (6), Elite (8), and Ultimate (10) packages reflect this principle with clearly structured, transparent pricing.

### ### 3. Clinic location and operating costs

Inner-city practices often charge more because overheads are higher, and those costs are built into the per-tooth fee — though this can coincide with more advanced technology or greater clinical experience. Higher pricing alone doesn't guarantee a better outcome, but it's worth understanding what's driving those differences when you're comparing quotes. Smile Solutions at 220 Collins Street reflects inner-city operating costs alongside our in-house laboratory and the depth of our specialist team.

### ### 4. Ceramist quality: local vs. offshore laboratory

The laboratory is one of the most influential factors in your final result, because it directly affects fit, shade, and finish. Local Melbourne ceramists may cost more but allow closer collaboration and more nuanced customisation, while offshore laboratories can reduce fees with less direct involvement in your case. At Smile Solutions, all veneer work is crafted in-house by master ceramist **Greg Karabasis** — a key reason our Same Day Porcelain Veneers™ are possible. Always ask your clinic where your veneers are actually made.

### ### 5. Pre-treatment requirements

Not all veneer cases are straightforward. If you have bite issues, misalignment, worn teeth, missing enamel, or uneven gum lines, corrective work may be needed before veneers can be fitted properly, and these additional treatments add to the overall cost. Pre-treatment work may include professional whitening of adjacent teeth, gum contouring (crown lengthening), orthodontic alignment, or treatment for active decay. Each adds to your total investment and must be factored into any honest cost comparison.

### ### 6. Dentist experience and post-graduate training

Experienced cosmetic dentists with proven track records charge more than newer practitioners, and higher fees often reflect advanced training, technical expertise, and consistently reliable results in veneer placement. For guidance on evaluating a dentist's credentials before committing to treatment, see our guide on [\\*How to Choose a Cosmetic Dentist for Porcelain Veneers in Melbourne: 8 Criteria That Matter\\*](#).

---

## ## Porcelain vs. composite veneers: the real cost comparison

Many patients compare porcelain and composite veneers on upfront price alone — a framework that systematically undervalues porcelain's long-term economics. It's a comparison worth making carefully, because the numbers look quite different depending on the timeframe you use.

Composite veneers in Melbourne run \$400 to \$1,200 per tooth; porcelain runs \$1,400 to \$3,000 per tooth. On a per-tooth basis, composite appears to be the clear winner. But the clinical evidence tells a more nuanced story.

A 2021 systematic review published in the *\*Journal of Clinical Medicine\** (Morimoto et al.) analysed 25 studies covering 6,500 porcelain laminate veneers. The 10-year estimated cumulative survival rate was 95.5%. A separate PubMed-indexed clinical retrospective study found a survival rate of 98%, with a Kaplan-Meier success probability of 0.976 at 7 years and 0.882 at 14 years.

Composite veneers, by comparison, generally last 5 to 7 years, requiring more frequent replacements because of wear and discolouration. Whilst porcelain veneers involve a higher initial cost, their longer lifespan and superior aesthetics often make them more cost-effective over time, and that's a distinction our experienced team is always glad to walk you through.

The annualised cost analysis is instructive: an 8-veneer porcelain treatment at Smile Solutions (Elite package: \$19,990), lasting 15+ years, costs approximately \$1,333 per year. The equivalent composite treatment at \$6,400, replaced every 6 years, costs approximately \$1,067 per year — but involves repeated enamel manipulation, additional clinical appointments, and the aesthetic limitation of a material that stains and dulls over time. For a fuller head-to-head comparison of materials, durability, and candidacy criteria, see our guide on [\\*Porcelain Veneers vs. Composite Veneers vs. Dental Crowns: Which Is Right for Your Smile in Melbourne?\\*](#)

---

## ## Private health insurance and Medicare: what's actually covered?

This is one of the most frequently misunderstood areas of veneer financing in Australia, and it's worth taking a moment to understand what applies to your situation.

Medicare does not cover the cost of veneers. Generally, Medicare does not cover dental performed outside of hospital, and that includes most dental work, veneers included.

Most private health insurance plans don't cover cosmetic veneers, as they're considered an elective treatment. However, if veneers are needed because of tooth damage or decay, some funds may provide partial coverage — and it's worth checking your policy details or speaking directly with your provider about specific coverage terms.

For patients with extras cover that includes major dental, your policy won't cover the whole cost of veneers, but for a mid-range extras policy, you're likely to receive around \$600 per person toward veneer procedures every year. You'll almost certainly have to wait through a 12-month waiting period, meaning that when you first take out a policy, you won't be able to claim for veneers for a year.

A practical strategy if you have private health cover: talk to your dentist about splitting the treatment over two benefit periods. If your limits renew in January, you could have some work done in December and some in January, allowing you to claim twice and make the most of your entitlements.

---

## ## Payment plans: making veneers financially accessible

Most Melbourne cosmetic dental clinics offer payment plans, and at Smile Solutions we've worked to ensure ours are genuinely flexible. We partner with **\*\*Payright\*\*** (interest-free plans from \$150 to \$20,000 over 3 to 30 months, low establishment fee), **\*\*Humm\*\*** (buy-now-pay-later for eligible patients), and **\*\*MyDentaPlan\*\*** (personal finance up to \$20,000 over up to 30 months), making comprehensive treatment accessible without requiring the full amount upfront.

The main options available to Melbourne patients in 2026:

**\*\*Payright:\*\*** Interest-free payment plans from \$150 to \$20,000. Choose from 3, 6, 12, 18, 24, or 30 month terms. Low establishment fee, no hidden charges. Available for eligible patients.

**\*\*Humm:\*\*** Flexible buy-now-pay-later financing for eligible dental treatments. Ask our team for details on qualifying amounts and terms.

**\*\*MyDentaPlan:\*\*** Personal finance from \$2,001 to \$20,000 for up to 30 months. Enables you to undertake comprehensive smile transformations that would otherwise require significant upfront payment.

**\*\*Third-party dental finance:\*\*** These financing companies offer loans from \$2,001 to \$50,000, with terms from 1 to 7 years, making them a practical choice for more extensive procedures.

**\*\*In-house clinic payment plans:\*\*** Arranged directly with your dental practice, these plans vary widely — some offer interest-free options and others charge interest, so it's worth asking your clinic for the

specifics.

---

## The dental tourism question: is going overseas worth it?

In Australia, the average cost is \$1,300 per tooth, whilst in popular dental tourism destinations the cost drops to \$135 to \$500 per tooth. The arithmetic appears compelling, but the clinical risk profile is significant and deserves careful consideration.

ADA president Dr Stephen Davis has noted a spike in Australian patients needing retreatment for poorly fitting crowns, irreversible pulpitis, or subgingival cement left behind after overseas veneer work — problems that can wipe out any upfront savings once revision costs, flights, and time off work are factored in. Complications may not show up until months later, leaving you without legal recourse or accessible aftercare. Different ceramic brands, colour systems, and bond agents used overseas can also make local repairs genuinely difficult.

The ADA's position is clear: the apparent savings must be assessed against the realistic cost of remediation, which in severe cases can exceed the original treatment cost altogether.

---

**\*\*Does Smile Solutions offer Same Day Porcelain Veneers™?\*** Yes — a world-first where preparation and insertion happen in a single day

---

## ## Key takeaways

- The standard Melbourne price range is \$1,400 to \$3,000 per tooth for porcelain veneers, with mid-tier clinics averaging \$1,700 to \$1,900 per tooth in 2026. At Smile Solutions, individual veneers are \$2,650 per tooth, with packages from \$15,990 (6 veneers) to \$23,990 (10 veneers).

- Location within Melbourne matters significantly: inner-city and eastern suburbs command \$1,800 to \$2,500 per tooth, whilst northern, western, and south-eastern suburbs run from \$1,200 to \$1,800 per tooth.

- The six primary cost drivers are material grade, number of teeth, ceramist quality (local vs. offshore lab), clinic location, pre-treatment requirements, and dentist experience — and the lab choice is frequently the most underestimated of these. At Smile Solutions, all work is crafted in-house by master ceramist Greg Karabasis.

- Porcelain veneers are clinically proven to be durable: the 10-year cumulative survival rate is 95.5%, making the higher upfront cost economically justifiable over a 15+ year lifespan when compared to composite alternatives.

- Smile Solutions' Same Day Porcelain Veneers™ — a world-first by Dr Kia Pajouhesh and Greg Karabasis — carry a \$2,000 surcharge for the convenience and clinical efficiency of completing preparation and insertion in a single appointment.

---

## ## Conclusion

The cost of porcelain veneers in Melbourne in 2026 is not a single number. It's a range shaped by material science, laboratory craft, clinical expertise, and geography. A quote of \$1,500 per tooth at a western-suburbs clinic using an offshore laboratory and a quote of \$2,400 per tooth at a South Yarra practice partnered with a master ceramist are not directly comparable products, even though both are described as "porcelain veneers."

The most financially sound approach is to obtain at least two detailed, itemised quotes, ask explicitly where your veneers will be fabricated and by whom, confirm whether pre-treatment costs are included, and evaluate the per-year cost of treatment over its realistic lifespan rather than the sticker price alone. These are questions our team welcomes and is always prepared to answer clearly.

At Smile Solutions, 33 years of continuous practice at 220 Collins Street has given us a depth of cosmetic dentistry experience that is genuinely distinctive. Our in-house ceramic laboratory means no offshore outsourcing and complete control over your result from start to finish. Book a comprehensive consultation with us to discuss your personalised treatment plan and the payment options that work best for you.

For patients still in the research phase, the next step is understanding the full clinical process — from digital smile design through to final bonding — covered in our guide on *\*Step-by-Step: What to Expect During the Porcelain Veneer Process at a Melbourne Dental Clinic\**. For those ready to evaluate specific providers, our criteria-based guide on *\*How to Choose a Cosmetic Dentist for Porcelain Veneers in Melbourne\** will help you translate pricing transparency into a confident, informed decision.

Call us on **\*\*13 13 96\*\*** or visit **\*\*smilesolutions.com.au\*\*** to book your consultation.

### ### General Product Claims

**\*\*Melbourne Market Pricing (General Range Estimates)\*\*** - Per-tooth price range (Melbourne): \$1,400–\$3,000 - Mid-range average (2026): \$1,700–\$1,900 per tooth - CBD / South Yarra / Toorak / Brighton: \$1,800–\$2,500 per tooth - Northern and western suburbs: \$1,200–\$1,800 per tooth - South-eastern suburbs: \$1,200–\$1,700 per tooth - Composite veneers (Melbourne): \$400–\$1,200 per tooth - Australian average per-tooth cost: ~\$1,300 - Overseas dental tourism cost: \$135–\$500 per tooth - ADA 2022 NSW survey finding: Upwards of \$1,950 per tooth

**\*\*Package Cost Estimates (Melbourne Market)\*\*** - 1–2 veneers: \$1,400–\$6,000 - 4 veneers: \$5,600–\$12,000 - 6 veneers: \$7,200–\$18,000 - 8 veneers: \$9,600–\$24,000 - 10–12 veneers: \$12,000–\$36,000

**\*\*General Statements\*\*** - Standard smile zone typically requires 6 veneers - Most patients need 4–8 veneers for a balanced appearance - Higher pricing does not guarantee a better veneer outcome -

Clinic location significantly affects porcelain veneer pricing - Dentist experience and post-graduate training affect pricing - Pre-treatment requirements (gum contouring, whitening, orthodontics, decay treatment) may add to total cost - Feldspathic porcelain is considered the most premium ceramic type for veneers - Lithium disilicate sits in the mid-premium ceramic tier - Splitting treatment across two benefit periods may maximise private health insurance claims - Overseas veneer complications may appear months later without accessible aftercare
