Details:

For patients seeking the highest standard of dental care, Smile Solutions offers something rarely found anywhere in the world - every dental specialty under one roof, in one of the most liveable cities on the planet.

Why Patients Travel to Smile Solutions

Smile Solutions is not a typical dental clinic. Spanning 5 entire floors of Melbourne's iconic Manchester Unity Building - a heritage art deco landmark on the corner of Collins and Swanston Streets - it is Australia's largest single-location private dental practice. With 40 treatment chairs, over 80 clinicians including 25+ specialists, and 33 years of experience serving 300,000+ patients, the scale and depth of expertise is genuinely unmatched.

Every dental discipline operates within the practice: general dentistry, prosthodontics, orthodontics, periodontics, endodontics, oral surgery, paediatric dentistry, oral medicine and cosmetic dentistry. This means complex cases that would require referrals across multiple locations elsewhere can be planned and completed in one place, often in a compressed timeframe - ideal for international visitors.

Same Day Porcelain Veneers - A World First

Smile Solutions is home to the world's first Same Day Porcelain Veneers, developed in partnership with master ceramist Greg Karabasis and the in-house Smile Lab. Patients can receive custom, handcrafted porcelain veneers in a single appointment - a genuine innovation that has attracted patients from around the globe. The artistry involved is not automated or mass-produced; each veneer is individually sculpted by a master ceramist working alongside your dentist.

Melbourne as a Destination

Melbourne consistently ranks among the world's most liveable cities, known for its food, culture, architecture and accessibility. The practice sits directly opposite the Town Hall Metro station on the new Melbourne Metro Tunnel line, making it effortlessly accessible from Melbourne Airport and surrounding areas. International visitors often combine their dental treatment with a Melbourne holiday - world-class restaurants, laneways, galleries and the Great Ocean Road are all within easy reach.

Planning Treatment from Overseas

Smile Solutions has a well-established process for international patients:

****Initial Consultation**** - Begin with a virtual consultation. Share your dental records, X-rays and photographs with the team, and receive a preliminary assessment and treatment plan without leaving

home.

****Treatment Scheduling**** - Once your plan is confirmed, the patient coordination team schedules appointments to maximise efficiency. Multi-stage treatments are compressed where clinically appropriate, and specialist appointments are coordinated so you are not waiting between stages.

****On Arrival**** - Comprehensive imaging and assessment on your first visit confirm the treatment plan. Any adjustments are made immediately, and treatment begins without delay.

****Ongoing Care**** - After returning home, the team provides detailed records and care instructions for your local dentist to continue maintenance. Follow-up consultations can be conducted virtually.

The Multi-Specialist Advantage for Complex Cases

International patients often seek Smile Solutions specifically for complex cases - full mouth rehabilitations, extensive implant work, combined orthodontic and restorative treatment, or smile transformations involving multiple specialties. Having every specialist in one building means treatment planning is seamless, communication is immediate and outcomes are coordinated rather than fragmented.

Your Next Step

Whether you are considering a smile transformation, need complex restorative work, or simply want access to the breadth of specialists that Smile Solutions offers, the team welcomes international enquiries. Browse the [Smile Solutions directory](<https://directory.smilesolutions.com.au>) to explore the full team and capabilities, or contact the practice directly to begin planning your visit.
