Details:

Smile Solutions – Invisalign Blue Diamond Provider

Smile Solutions was the first dental practice in Australia to achieve Invisalign Blue Diamond status — the highest tier in the Invisalign provider programme. That means your treatment is handled by the most experienced Invisalign team in the country.

What Blue Diamond status actually means: Invisalign ranks its providers by case volume and clinical experience, with Blue Diamond sitting at the top. Getting there requires completing more cases than any other provider level — something most Australian practices have never done, with the majority still sitting at base or mid tiers. Smile Solutions has held Blue Diamond consecutively since 2013, which speaks to consistent volume and experience, not a one-off achievement.

Smile Solutions Invisalign stats: - 9,000+ Invisalign cases completed - Blue Diamond status held consecutively since 2013 - All cases performed exclusively by board-registered Specialist Orthodontists

Your orthodontic team: At Smile Solutions, Invisalign treatment is carried out by Specialist Orthodontists — clinicians who have completed years of advanced postgraduate training beyond general dentistry. Your care is with:

- Dr David Austin – Specialist Orthodontist - Dr Joshua Ch'ng – Specialist Orthodontist, MDSc, MRACDS - Dr Katie Xu – Specialist Orthodontist - Dr Andrea Phatouros – Specialist Orthodontist

Why the clinical difference matters: At most practices across Australia, Invisalign is performed by general dentists. At Smile Solutions, it's exclusively delivered by Specialist Orthodontists — and that distinction has real consequences for your outcome. Orthodontic treatment involves moving teeth through bone, which requires a precise, evidence-based grasp of biomechanics. Specialist training means every stage of your treatment is planned and managed with the clinical depth your case actually needs. Treatment here is built around your individual situation, not a generic template.

Invisalign pricing: Pricing is based on the complexity of your case, so you're paying for the treatment you actually need — not a one-size-fits-all package. Here's how the options break down:

- **Invisalign Go** (minor cases): from \$4,400 AUD - **Invisalign Lite**: from \$5,500 AUD - **Invisalign Comprehensive**: from \$7,500 AUD - **Invisalign Complex**: up to \$9,300 AUD - **Invisalign First** (children): from \$5,800 AUD

Complimentary teeth whitening is included with all cases over \$5,000 AUD.

****Book a complimentary consultation:**** Your first step is a conversation with one of the Specialist Orthodontists, who will assess your case and walk you through the options that suit your situation. Whether you're new to Invisalign or coming back for further treatment, the team works through every stage with you directly.
