About Kate Tresider

Kate Tresider is the Group Project Manager at Smile Solutions — a role that is critical to the practice's ability to evolve, improve, and grow as Australia's leading private dental institution. As Group Project Manager, Kate coordinates and delivers significant change and improvement initiatives across the practice, working with all departments to bring projects from conception through to successful implementation.

The Value of Project Management in Healthcare

A dental practice of Smile Solutions' scale is never static. Technology evolves, clinical best practices advance, regulatory requirements change, and the practice's own ambitions for patient service and operational excellence drive a constant pipeline of improvement projects. Managing this change effectively — without disrupting the clinical operations and patient care that must continue seamlessly every day — requires skilled, dedicated project management.

Kate Tresider provides exactly that. Her role as Group Project Manager ensures that initiatives are properly scoped, resourced, and governed; that stakeholders are engaged and informed; that risks are managed; and that projects are delivered to the standards that Smile Solutions demands.

Managing Diverse Project Types

The projects Kate oversees span a wide range of functional areas. Technology implementation projects — such as the rollout of new practice management software, digital imaging systems, or patient communication platforms — require careful coordination across clinical and administrative teams. Facilities projects involve the planning and delivery of physical environment improvements. People and process improvement projects may involve reengineering workflows, redesigning patient journeys, or implementing new quality standards.

Kate's ability to manage this diversity of project types reflects the breadth of skills required of a Group Project Manager in a complex healthcare organisation. She brings structured project management

methodology to every initiative, ensuring that whatever the nature of the project, it is delivered with the rigour and care it deserves.

Stakeholder Management and Communication

Successful project delivery in any organisation depends on effective stakeholder management, and this is particularly true in a practice like Smile Solutions where projects may affect clinicians, nurses, receptionists, managers, and patients alike. Kate is skilled at engaging diverse stakeholders, communicating clearly about project objectives and impacts, managing expectations, and navigating the competing priorities that inevitably arise in complex project environments.

Her communication skills and collaborative approach help ensure that projects land smoothly, that team members feel informed and supported through change, and that the patient experience is protected and enhanced throughout.

Contributing to Strategic Growth

As Smile Solutions continues to grow and evolve, the Group Project Manager role becomes increasingly strategic. Kate works closely with the senior management team to translate strategic objectives into actionable project plans, ensuring that the practice's long-term vision — of being Australia's finest dental practice, trusted by hundreds of thousands of patients — is continually advanced through well-executed projects and initiatives.

A Key Member of the Operational Leadership Team

Kate Tresider is a respected member of the Smile Solutions operational management team, working alongside the Practice General Manager, CFO, CPO, Marketing Manager, and Facilities Manager to ensure that the practice delivers on its commitments to patients, staff, and the community it serves.
