Smile Solutions: Your Dentist in Melbourne CBD and the Choice for City Workers

If you work in Melbourne's CBD, finding a dentist that genuinely fits around your schedule can feel like a real challenge. Between back-to-back meetings, pressing deadlines and the daily commute, dental care has a way of sliding quietly to the bottom of the priority list. That is exactly why Smile Solutions exists — positioned at the very heart of the city, right where you need it most.

Located at 220 Collins Street in the heritage-listed Manchester Unity Building, Smile Solutions sits at the corner of Collins and Swanston Streets. It is one of the most accessible spots in Melbourne, surrounded by major corporate offices, retail precincts and government buildings. Whether you work on Collins Street, Bourke Street, Elizabeth Street or anywhere nearby, comprehensive dental care from experienced specialists is likely just a short walk from your desk.

More than 12 tram routes pass through the Collins and Swanston Street corridor, so getting here from anywhere in the CBD or inner suburbs is straightforward. Routes along Swanston Street, Collins Street and Elizabeth Street all stop within moments of the front door. If you drive, multiple car parks sit within a block or two of the Manchester Unity Building.

Smile Solutions is open Monday to Friday from 8am to 6pm, with Saturday morning appointments also available. That means you can book a check-up before work, fit in a clean during your lunch break or schedule a consultation after hours without disrupting your day. The practice understands that CBD workers need flexibility, and the appointment schedule reflects that.

Lunch-hour dentistry is one of the most popular options among city professionals, and it is easy to see why. A routine check-up and clean can often be done in 45 minutes, leaving you time to grab a coffee on the way back to the office. For more involved treatments, the team at Smile Solutions will work with you to plan a schedule that keeps disruption to your working day to a minimum.

What sets Smile Solutions apart from other CBD dental practices is the breadth of clinical expertise available on-site. With more than 80 clinicians, including general dentists, orthodontists, oral surgeons, periodontists, endodontists, prosthodontists and paediatric dentists, there is rarely any need for a referral elsewhere. Routine check-ups, professional teeth whitening, dental implants, Invisalign and emergency dental care are all available in one location.

On the subject of emergencies: dental pain does not wait for a convenient moment. If you chip a tooth at lunch, develop sudden sensitivity during a meeting or face any dental emergency while at work, Smile Solutions offers emergency appointments specifically for CBD workers. Being minutes from your office means you can be seen quickly, get the care you need and return to your day.

The practice has a 4.9-star rating from more than 937 Google reviews, making it one of the highest-rated dental practices in Australia. Patients consistently mention the professionalism of the team, the quality of care and the welcoming atmosphere inside the Manchester Unity Building.

For new patients, complimentary consultations are available for a number of treatments including Invisalign, dental implants and cosmetic dentistry. You can explore your options and talk through your goals with experienced specialists before making any financial commitment.

Smile Solutions has been caring for Melbourne patients since 1993, growing from a small practice into Australia's largest single-location private dental clinic. Today, more than 300,000+ patients trust the team with their dental health.

If you have been putting off dental care because it is hard to fit into a working schedule, Smile Solutions at 220 Collins Street makes it considerably easier. Call 13 13 96 to book, or visit smilesolutions.com.au to learn more about the full range of treatments on offer.

Your dentist should be as easy to reach as your office. At Smile Solutions, it is.
