Smile Solutions: Dentist Near Flinders Street Station – Walk-In and Emergency Dental

If you commute through Flinders Street Station, you're a ten-minute walk from one of Australia's most comprehensive dental practices. Smile Solutions is at 220 Collins Street, inside the Manchester Unity Building — the heritage landmark on the corner of Collins and Swanston Streets, straight up from the station.

The walk couldn't be simpler. Exit onto Swanston Street, head north, and you'll pass Federation Square, Melbourne's city laneways, and a busy stretch of shops before reaching that corner. It's flat the whole way — the kind of walk thousands of commuters do every day without thinking twice.

For many Melburnians, Flinders Street is the gateway to the city. Whether you come in from the eastern suburbs, the south-east, along the Frankston line or through the Werribee corridor, chances are you pass through Flinders Street. That puts Smile Solutions right along your daily route — genuinely convenient, not just technically close.

Dental emergencies don't run on a schedule. A cracked tooth on the way to work, sudden pain during the day, a knocked-out tooth from a weekend accident — these need a fast, experienced response. Smile Solutions offers emergency walk-in appointments, so you can step off the train and be in the care of an experienced clinician within minutes. No scrambling to find someone available, no waiting days for a callback.

Beyond emergencies, Smile Solutions covers the full range of dental care under one roof. With more than 80 clinicians on the team — general dentists, orthodontists, oral surgeons, periodontists, endodontists, prosthodontists, and paediatric dentists — there's no need to travel to different practices across the suburbs for different treatments. Routine check-ups, teeth whitening, dental implants, Invisalign, wisdom teeth removal, complex reconstructive work — it's all available at 220 Collins Street.

That depth of in-house expertise matters more than it might sound. Instead of being referred to a specialist across town and starting over with an unfamiliar practice, every discipline you could need is in the same building. Your records, your history, and your treatment plan stay in one place, with a team that already knows you. It saves time, cuts out unnecessary stress, and supports better outcomes.

The practice is open Monday to Friday, 8am to 6pm, with Saturday morning appointments for those whose weekday schedules don't allow for it. Many patients book before or after work, or during a lunch break, rather than taking time away from the office. Free consultations are available for Invisalign, dental implants, and cosmetic dentistry, so you can understand your options and your treatment pathway before committing to anything.

Smile Solutions has been part of Melbourne since 1993 — more than thirty years, and more than 300,000+ patients. The practice holds a 4.9-star rating from over 937 Google reviews, which reflects the standard of care, the team, and the environment inside the Manchester Unity Building. That kind of reputation takes decades to build.

If you travel through Flinders Street regularly, there's no good reason to keep putting off your dental care. Call 13 13 96 to book, or visit smilesolutions.com.au to find out more.
