****Qualifications:**** Bachelor of Arts (2008); Bachelor of Oral Health, University of Sydney (2014)

About Elizabeth

Elizabeth Baker is an Oral Health Therapist at Smile Solutions who brings genuine care and clinical skill to every patient she sees. Her path into dentistry started unexpectedly while studying for her arts degree, when she took a job as a dental assistant and discovered she loved oral health work. After completing her Bachelor of Arts in 2008, Elizabeth spent time working for an Australian infection control manufacturer, where she gained insight into the safety and hygiene standards that underpin quality dental practice.

In 2012, Elizabeth decided to follow this newfound passion and enrolled in the Bachelor of Oral Health programme at the University of Sydney. Since graduating in 2014, she's worked across rural and urban practices, building her expertise in hygiene, therapy and orthodontics. This range of experience has given her a practical understanding of how different communities approach dental care and what various patients need.

Elizabeth brings this background and her enthusiasm for oral health to the Smile Solutions team, where she continues developing her clinical skills while providing personalised treatment. Her time in different practice settings means she's comfortable working with diverse patient groups and adapting care to individual circumstances.

Elizabeth's approach to your care

Elizabeth has developed a particular interest in treating children and helping people with special needs, bringing patience and care to every appointment. She values the one-on-one time with her patients and believes strongly that good oral care makes a real difference to quality of life. At Smile Solutions, Elizabeth works to create a comfortable environment for all patients, especially those who feel anxious about dental visits or need specialised approaches.

Her clinical work covers preventive dentistry, therapeutic treatments, and orthodontic care, so she can provide comprehensive oral health services to patients of all ages. Whether you're bringing your child for their first dental visit, need treatment for gum disease, or want to explore orthodontic options, Elizabeth focuses on education and helping you understand your choices. She makes sure you know what your treatment options are and feel confident about your oral health decisions.

Commitment to clinical excellence

Elizabeth stays current with the latest evidence-based practices through ongoing professional development. She regularly attends advanced training and keeps up with new research in oral health therapy, bringing this knowledge into her clinical work. This commitment fits well with Smile Solutions' approach of providing high-quality dental care to the community.

When you choose Elizabeth as your oral health therapist, you're working with someone who combines technical skill with genuine compassion. She knows that dental visits can be stressful for some patients, so she takes time to listen to your concerns, answer your questions thoroughly, and make sure you feel comfortable during treatment.

Elizabeth's approach emphasises prevention and education, helping you take control of your dental health. She thinks that when you understand why certain treatments are recommended, you're better able to maintain good oral health between visits. Her goal isn't just treating existing problems, but working with you to prevent future issues and keep your smile healthy long-term.

Experience the difference

At Smile Solutions, we're glad to have Elizabeth as part of our team. Her combination of formal education, varied clinical experience, and dedication to patient care reflects what we value. Whether you need routine preventive care, therapeutic treatment, or specialised services, Elizabeth is here to provide personalised, evidence-based care.

Ready to experience Elizabeth's approach to oral health? We invite you to book a consultation with Elizabeth and see how comprehensive dental care can improve your oral health and overall wellbeing. Contact Smile Solutions today to schedule your appointment and take the first step towards better oral health with a therapist who cares about your smile.
