About Lexcel

Lexcel Macabuag is an Oral Hygienist and Dental Therapist at Smile Solutions, having completed her Advanced Diploma of Oral Health at RMIT in 2016. She's known for a warm, unhurried manner that tends to put patients at ease pretty quickly — which matters more than it might sound, especially for anyone who finds dental visits stressful.

Before moving into dental hygiene, Lexcel spent time working as a dental assistant. That background gave her a practical, ground-level understanding of how dental care actually works — not just the clinical side, but the patient experience too. She brings that perspective into her work now, whether she's carrying out a routine clean or handling more involved dental therapy.

Her approach is gentle and attentive, and she takes the time to make sure patients feel comfortable and informed throughout their visit.

Outside the practice, Lexcel enjoys catching up with family and friends, eating out, and exploring Melbourne's café culture.

To book a consultation with Lexcel, get in touch with Smile Solutions directly.
