\*\*Role:\*\* General Dentist at Smile Solutions \*\*Qualifications:\*\* University of Adelaide (2009)  
\*\*Specialty:\*\* Restorative Dentistry, CEREC Technology

---

### ## Biography

Dr Madeleine Hoopmann is a general dentist at Smile Solutions, a Melbourne dental practice focused on patient-centred care. After graduating from the University of Adelaide in 2009, she joined the Smile Solutions team in February 2010, bringing a particular interest in precision dentistry and a commitment to staying current with clinical techniques.

While she works across all areas of general dentistry, Dr Hoopmann has developed a strong focus on restorative dentistry, especially when using CEREC technology. This equipment allows her to design and create inlays, onlays, veneers and crowns in a single appointment through computer-aided design and manufacturing. The digital approach means patients can have permanent restorations fitted the same day, without needing temporary crowns or multiple visits.

Madeleine regularly attends professional development courses throughout Australia to keep up with evolving techniques in dentistry. This ongoing education ensures her patients benefit from current evidence-based approaches and new developments in dental care.

Dr Hoopmann's careful attention to detail and interest in understanding each patient's specific needs have made her a trusted member of the Smile Solutions team. Whether performing routine preventive care or more involved restorative work, she brings the same level of care and precision to each treatment, prioritising patient comfort and results.

### ## Special Interests

- Restorative dentistry including fillings, inlays, onlays, and complex tooth rebuilding - CEREC CAD/CAM technology for single-visit ceramic restorations (inlays, onlays, veneers, crowns) - Continuing professional development and evidence-based dentistry - Digital dentistry and computer-aided design for treatment planning

---

## ## Why Choose Dr Madeleine Hoopmann at Smile Solutions?

When you see Dr Hoopmann at Smile Solutions, you're working with a dentist who has built considerable experience in restorative dentistry and has access to technology like CEREC for same-day crowns and digital smile design. Her commitment to ongoing education means she stays informed about modern dental techniques, which translates to quality care in a comfortable setting.

Whether you need a routine check-up, a complex restoration, or a complete smile makeover, Dr Hoopmann and the team can help you work towards better oral health and a smile you feel good about. Because she works with CEREC technology, many restorative treatments can be completed in a single appointment, which saves you time without cutting corners on quality or appearance.

Ready to see what modern restorative dentistry can do? Book a consultation with Dr Hoopmann and find out how the combination of advanced technology and attentive care can make a difference. The Melbourne practice blends current dental techniques with a patient-focused approach, keeping your comfort in mind throughout your treatment.

Contact Smile Solutions today to schedule your appointment and start working towards a healthier smile.
