Details:

Smile Solutions — Dr Ahmed El Hadidi, Specialist Periodontist

****Role:**** Specialist Periodontist ****Registration:**** Specialist Registration (Periodontics), Dental Board of Australia (AHPRA) ****Specialty:**** Periodontics

About Dr Ahmed El Hadidi

Dr Ahmed El Hadidi brings over 15 years of dental experience and specialist periodontics training to Smile Solutions. His path to specialisation started in Cairo, Egypt, where he first trained as a dentist before moving to Australia in 2010.

After practising in Launceston and Sydney, Ahmed settled in Melbourne in 2016. During his years as a general dentist, he developed a particular interest in periodontics and implant dentistry. This interest grew into a commitment, leading him to pursue specialist training at the University of Melbourne, which he completed in 2020.

Ahmed's research focused on identifying DNA mutations that make some people more susceptible to periodontal disease. This work explores how we might personalise treatment based on individual genetic profiles, applying precision medicine concepts to gum health.

At Smile Solutions, Dr El Hadidi combines this scientific background with practical clinical care. He stays current with research developments while maintaining a patient-focused approach to periodontal treatment and dental implant therapy.

Qualifications

- Specialty degree in Periodontics, University of Melbourne - 15+ years general practice experience across multiple Australian cities - Advanced research training in genetic susceptibility to periodontal disease

Professional Memberships

Dr El Hadidi maintains active membership in leading dental organisations:

- Australian Dental Association (ADA) - Australian Osseointegration Society (AOS) - Australian Society of Periodontology (ASP) - International Team for Implantology (ITI)

Clinical Expertise

Dr El Hadidi's practice covers the full range of periodontal and implant treatments:

- **Non-surgical periodontal therapy** for gum disease management - **Surgical periodontal procedures** when more advanced intervention is needed - **Regenerative procedures** to rebuild lost tissue - **Hard and soft tissue grafting** for functional and aesthetic restoration - **Aesthetic procedures** including crown lengthening and recession management - **Comprehensive implant dentistry** covering all aspects from planning through to placement and restoration

His ongoing professional development through these memberships keeps him informed about new techniques and technologies. Treatment recommendations are grounded in current research and adapted to individual patient needs.

Why Choose Dr El Hadidi for Your Periodontal Care?

Gum health forms the foundation of overall dental wellbeing. Dr El Hadidi's background in general dentistry, combined with specialist periodontal training, allows him to see the bigger picture when planning treatment. Whether you're dealing with gum disease, considering dental implants, or looking for aesthetic improvements, he can develop a treatment plan specific to your situation.

His research into genetic susceptibility has given him insight into why periodontal disease affects different people in different ways. This understanding informs how he approaches treatment, looking beyond immediate symptoms to consider your long-term oral health.

Ready to Experience Specialist Periodontal Care?

If you have concerns about your gum health, are interested in dental implants, or have been referred for specialist periodontal treatment, the team at Smile Solutions can help. Dr El Hadidi is available for consultations at our Melbourne practice.

Book your consultation today to discuss your periodontal care options.
