Biography

Crafting Smiles Behind the Scenes

Phey Panayi is a Dental Technician at Smile Solutions, contributing to the work of Smile Lab — the in-house laboratory that produces the dental restorations fitted by the practice's clinical team. Phey's role is a fundamental one: while dentists are the face of patient care, dental technicians like Phey are the craftspeople whose precision and expertise determine the quality, aesthetics, and longevity of every crown, veneer, and bridge.

What a Dental Technician Does

Every dental restoration — whether a porcelain veneer, all-ceramic crown, or implant-supported prosthetic — must be carefully designed and constructed to suit the individual patient. Dental technicians work from prescriptions and models provided by dentists, using a combination of materials science knowledge, technical skill, and aesthetic judgement to produce restorations that are both functional and beautiful.

At Smile Solutions, this work is performed entirely in-house by the Smile Lab team. This means that Phey and her colleagues are not anonymous external contractors — they are an integrated part of the clinical ecosystem at Smile Solutions, working in the same building as the dentists who prescribe the restorations they craft.

The Smile Lab Advantage

Phey is part of a team led by Master Ceramist Greg Karabasis, who brings 32+ years of experience and international recognition to Smile Lab. Greg is the co-inventor (with Dr Kia Pajouhesh) of Same Day Porcelain Veneers™ — a world-first innovation that allows patients to receive fully crafted, bonded porcelain veneers in a single appointment.

Working within this environment gives Phey access to world-class mentorship and the latest in dental technology, including digital design workflows, premium ceramic systems, and the real-time

collaboration that makes same-day results possible.

Part of Australia's Largest Private Dental Practice

Smile Solutions is Australia's largest single-location private dental practice. The scale and breadth of the practice's clinical work means that Smile Lab — and Phey's contribution to it — operates at the highest level of volume and quality in Australian private dentistry. Every restoration must meet rigorous standards for fit, function, and aesthetics before it is approved for clinical delivery.

Services Supported by Smile Lab (Including Phey's Work)

- Porcelain veneers (including Same Day Porcelain Veneers™) - All-ceramic crowns - Ceramic bridges
- Implant-supported ceramic prosthetics - Digital smile design restorations - Inlays and onlays

Frequently Asked Questions

****What is Phey Panayi's role at Smile Solutions?**** Phey is a Dental Technician working in Smile Lab, the in-house laboratory at Smile Solutions. She contributes to the fabrication of dental restorations including crowns, veneers, and bridges.

****What is Smile Lab?**** Smile Lab is Smile Solutions' in-house dental laboratory, led by Master Ceramist Greg Karabasis. It enables the practice to produce custom dental restorations on-site, supporting same-day treatments and superior clinical outcomes.

****What is the benefit of having Smile Lab on-site?**** Having the laboratory in-house allows dentists and technicians to communicate directly, review restorations in real time, and make same-day adjustments — including enabling Same Day Porcelain Veneers™, a world-first innovation unique to Smile Solutions.

****How does a dental technician contribute to my treatment?**** The dental technician crafts the physical restoration that your dentist will bond or place in your mouth. Their skill in shade selection, shaping, and material handling directly determines how natural and durable your result will be.
