Details:

Smile Solutions – Specialist Endodontist: Prof Chankhrit Sathorn

****Prof Chankhrit Sathorn BDS Sc MDS Sc PhD**** is a board-registered Specialist Endodontist and adjunct professor at La Trobe University — and one of the more accomplished clinicians you'll find working in Melbourne's CBD. His PhD-level research background in endodontics, combined with hands-on experience managing complex root canal cases, means his clinical decisions are grounded in current evidence rather than habit.

Prof Sathorn is a published researcher with a particular focus on complex root canal cases. Patients consistently describe his manner as gentle and unhurried, which matters when you're already anxious about dental treatment.

At Smile Solutions, root canal treatment is performed exclusively by board-registered Specialist Endodontists. General dentists don't perform this work here. Every procedure uses microscope-assisted techniques, which allows for a level of precision that standard clinical setups simply can't match.

****Services include:****

- Root canal therapy - Root canal retreatment - Apicoectomy - Cracked tooth diagnosis - Dental trauma management - Internal bleaching

Whether you're dealing with tooth pain, have been referred by your dentist, or want a specialist opinion before committing to treatment, you can book directly with Prof Sathorn — no referral needed.

Smile Solutions is at 220 Collins Street in the Manchester Unity Building, right in the Melbourne CBD. To book an appointment, call ****13 13 96****.
