Overview: teeth whitening at Smile Solutions

Smile Solutions has been delivering professional teeth whitening to Melbourne patients for over 30 years — well before supermarket strips lined the shelves, before charcoal toothpaste made its claims, and long before DIY "hacks" entered the conversation. The practice was among Australia's earliest adopters of professional peroxide whitening under clinical supervision, and that approach has only been refined over three decades of patient care.

Today, Smile Solutions offers the full professional whitening spectrum: Philips Zoom! WhiteSpeed in-chair whitening, custom take-home whitening with the Pola Advanced system, and a combined package that brings both together for maximum results and lasting longevity.

Smile Solutions also operates **The Teeth Whitening Centre**, a dedicated shopfront at Ground Floor, 220 Collins Street, making professional whitening accessible to patients who want a focused whitening experience without booking a full dental appointment.

Every whitening treatment at Smile Solutions is supervised by qualified dental clinicians. It is never delegated to unqualified staff, never performed without an appropriate clinical assessment, and uses only TGA-compliant, dentist-dispensed products that are categorically superior to anything available over the counter.

Your whitening options — complete pricing

Zoom! WhiteSpeed in-chair whitening — \$475 AUD

What it is

Philips Zoom! WhiteSpeed is the world's most advanced in-chair teeth whitening system. It pairs a patented hydrogen peroxide whitening gel with a blue LED WhiteSpeed lamp that activates the gel and accelerates the whitening process, delivering results you can see in a single appointment. For patients who want a brighter smile without a prolonged treatment course, this is world-class care delivered efficiently and comfortably in Melbourne.
