Same Day Porcelain Veneers at Smile Solutions Melbourne - World First

Your definitive guide to Same Day Porcelain Veneers at Smile Solutions - the innovation, the process, the people, and everything you need to know.

Overview

Same Day Porcelain Veneers is a proprietary innovation developed at Smile Solutions in Melbourne. It gives patients access to bespoke, individually handcrafted porcelain veneers - from tooth preparation through to final insertion - all in a single day. No temporary veneers, no second appointment, no waiting period, and no compromise on quality.

Smile Solutions introduced Same Day Porcelain Veneers to eliminate the 2-3 week temporary veneer period that every other practice requires. This innovation was recognised with the Australian Business Awards - Business Innovation (2024), and was developed by Dr Kia Pajouhesh, Managing Director and Founding Principal of Smile Solutions, in close collaboration with master ceramist Greg Karabasis at Studio 32 - Smile Solutions' in-house ceramic laboratory.

What makes this possible is the on-site ceramic studio at 230 Collins Street, staffed by experienced ceramists who work exclusively for Smile Solutions patients. Your veneers are crafted by specialists who know your case, your smile, and your goals.

Same Day Porcelain Veneers are available only at Smile Solutions, located in the heritage-listed Manchester Unity Building at the corner of Collins and Swanston Streets in Melbourne's CBD. The intellectual property is proprietary to Smile Solutions.

If you'd like to explore what Same Day Porcelain Veneers could mean for your smile, book a consultation with our team today.
