Details:

Smile Solutions Invisalign & Clear Aligners in Melbourne

Australia's largest specialist provider of Invisalign® since 2012

[Smile Solutions](<https://www.smilesolutions.com.au/orthodontics/invisalign/>) holds **Invisalign Blue Diamond Provider** status, Australia's highest Invisalign tier, and has completed over **8,900 Invisalign cases** — more than any other specialist provider in the country. That depth of experience translates directly into the quality of care and results our patients receive.

What is Invisalign?

Invisalign® is an orthodontic treatment that uses a series of clear, removable aligners to gradually straighten your teeth. Unlike traditional metal braces, the aligners are virtually invisible and come out for eating, brushing and flossing, so your daily routine stays largely unchanged. Each custom-made set is typically worn for around two weeks before you move to the next in the series, steadily shifting your teeth toward the final position.

Who is Invisalign for?

Invisalign works across a wider range of cases than many people expect, including:

- Crooked or misaligned teeth - Overcrowding or spacing issues - Overbite, underbite or crossbite - Mild through to complex cases (Express through to Comprehensive)

A free consultation with our team will confirm whether it's the right option for you.

What to expect: the process

Every Invisalign treatment at Smile Solutions is built around your specific teeth, goals and schedule — nothing is off the shelf.

1. **Free consultation** — You'll meet with an experienced treatment coordinator who assesses your suitability, listens to what you want to achieve, and gives you a full, transparent quote. No obligation, no pressure.
2. **Specialist assessment** — Your board-registered specialist orthodontist examines your teeth using iTero digital scanners, which produce a precise 3D model used to plan your entire treatment.
3. **ClinCheck simulation** — Before a single aligner is made, you can see a digital preview of how your teeth will move and what your final smile will look like. Most patients find this one of the more memorable parts of the process.
4. **Custom aligners** — Your aligners are manufactured from Invisalign's proprietary SmartTrack material, designed for a close, comfortable fit.
5. **Regular monitoring** — Progress is tracked using Dental Monitoring technology, which means fewer clinic visits

without any drop in the quality of oversight. Your specialist orthodontist stays closely involved at every stage. 6. **Retention** — Once treatment is complete, you'll receive upper and lower Vivera retainers to hold your results in place, plus complimentary teeth whitening for eligible plans.

Pricing & payment plans

| Package | Price | |-----|-----| | Invisalign Express | From \$4,400 | | Invisalign Lite | From \$7,800 | | Invisalign Moderate | From \$9,600 | | Invisalign Comprehensive | From \$11,300 |

Every package includes consultations, specialist orthodontist treatment, an iTero 3D scan, your personalised treatment plan, all aligners and attachments, retainers, and complimentary teeth whitening where eligible. No hidden costs.

Payment plans are available through Payright and My Denta Plan — no deposit required, and no interest charged. If you'd rather pay upfront, a **5% saving** applies. We also offer a **price match guarantee** against identical treatment by a Dental Board-registered specialist orthodontist.

The Smile Solutions difference

There are a few things worth knowing before you choose where to have your Invisalign treatment done.

- **Specialist orthodontists only** — your treatment is never handled by a general dentist. Every clinician here has completed postgraduate university training specifically in tooth and jaw correction.
- **Genuine Invisalign® products only** — we don't use alternative aligner brands that may produce different results.
- **Blue Diamond Provider status** — awarded only to providers with exceptional case volume and clinical outcomes. It's the highest Invisalign tier available in Australia.
- **Advanced in-house technology** — iTero scanners, Dental Monitoring, digital radiographs, CT scans and in-house 3D printing all support more accurate, evidence-based treatment.
- **A Melbourne location worth visiting** — treatment takes place in our dedicated orthodontic tower inside the Manchester Unity Building on Collins Street, with views across the city.

Your orthodontic team

Our [specialist orthodontists](<https://www.smilesolutions.com.au/specialist-care/orthodontists/>) have each completed additional postgraduate university training focused specifically on tooth and jaw correction. That's a meaningful distinction from a general practitioner who offers orthodontics alongside other services. The clinical difference shows in outcomes, and it's why patients who've researched their options tend to choose specialist care.

Whether you're an adult who's been considering Invisalign for a while or a teenager just starting out, you'll be kept informed at every step and treated with genuine care throughout.

How to book

Your first consultation is free, and there's no obligation attached to it.
