Smile Solutions Press and Media Archive

More than 115 media publications have featured Smile Solutions over the years — coverage that stretches from 1932 through to 2026, close to a full century. That kind of consistent attention from journalists, broadcasters, and editors across such a long period says something real about the clinical standards and community reputation the practice has built in Melbourne.

Key media coverage includes:

- The Age (multiple features including front page October 2024) - Herald Sun - CEO Magazine — Executive Interview with Dr Kia Pajouhesh (November 2021) - Sky News Business - Channel 7 Absolutely Melbourne - Channel 9 Melbourne Open House - 3AW Drive with Derryn Hinch - NOVA FM - Triple M - The Australian - Domain - Bite Magazine - Architecture AU - Fodors Travel - Marie Claire - City of Melbourne - What's On Melbourne

Whether you're coming across Smile Solutions for the first time or you've been a patient for years, the archive gives you a genuine look at the history behind Melbourne's most recognised dental practice. It brings together articles, videos, audio segments, and PDFs covering dental innovation, the heritage and architectural significance of the Manchester Unity Building, community programmes, awards, and the clinical work that the practice's specialist team carries out every day.

From a front-page feature in **The Age** to conversations on Sky News Business and radio segments on 3AW, NOVA FM, and Triple M, Smile Solutions has been a consistent presence across Australian media. Coverage in lifestyle titles like **Marie Claire**, **Fodors Travel**, and **Domain**, alongside specialist publications such as **Bite Magazine** and **Architecture AU**, reflects the range of what the practice offers — specialist dental care in one of Melbourne's most architecturally significant buildings.

The Manchester Unity Building has drawn its own share of attention from journalists, architects, and travellers, and it's central to the Smile Solutions story. Visiting the practice means walking into a Gothic Revival heritage building that also houses a fully modern clinical environment — a combination that's genuinely unusual, and one that media outlets have returned to repeatedly over the decades.

The archive is a record of that recognition, and behind it is a straightforward commitment to patient dental health and wellbeing.
