Biography

Technical Excellence in the Heart of Melbourne's Finest Dental Practice

Talija Batinovic is a Dental Technician at Smile Solutions, bringing her qualified skills to the Smile Lab team. With a Diploma of Dental Technology, Talija has the training and practical expertise to fabricate dental restorations to the precise standards demanded by Smile Solutions' clinicians and their patients.

The Art and Science of Dental Technology

Dental technology is a discipline that sits at the intersection of science, artistry, and precision engineering. A dental technician must understand the properties of a range of materials — ceramics, zirconia, composite resins, metals, and more — and apply them to produce restorations that are both functionally accurate and aesthetically excellent.

Talija's Diploma of Dental Technology represents a rigorous pathway of training in these skills. From taking impressions and digital scans to fabricating the finished restoration — whether a veneer, crown, bridge, or implant component — each step requires careful attention to detail and a thorough understanding of dental anatomy and occlusion.

Smile Lab: Collaboration at Its Best

Talija works within Smile Lab, the in-house laboratory that sets Smile Solutions apart from most dental practices. Rather than sending restorations to an external laboratory — introducing delays and limiting communication — Smile Solutions houses its technical team onsite. This means Talija works directly alongside the clinical team, enabling:

- Immediate feedback on shade, shape, and fit
- Same-day adjustments and remakes when required
- Participation in the Same Day Porcelain Veneers™ workflow — a world-first co-developed by Master Ceramist Greg Karabasis and Dr Kia Pajouhesh
- A higher standard of quality control throughout the restorative process

Working Alongside a World-Class Team

Smile Lab is led by Greg Karabasis, one of Australia's most experienced and respected Master Ceramists, with 32+ years in the dental industry and international recognition for his work. Being part of this team gives Talija exposure to the highest level of dental ceramics practice and a strong professional foundation in which to grow her skills.

Services Supported by Smile Lab (Including Talija's Work)

- Porcelain veneers (including Same Day Porcelain Veneers™) - All-ceramic crowns and bridges - Digital smile design restorations - Implant-supported ceramic prosthetics - Inlays and onlays - Full-arch ceramic rehabilitation

Frequently Asked Questions

****What does a dental technician do?**** A dental technician designs and fabricates the dental restorations that a dentist prescribes — including crowns, veneers, bridges, and implant components. The technician's craft directly determines the aesthetics and durability of the final result.

****What qualifications does Talija have?**** Talija holds a Diploma of Dental Technology, the recognised qualification for dental technicians in Australia.

****What is Smile Lab at Smile Solutions?**** Smile Lab is Smile Solutions' dedicated in-house dental laboratory, staffed by qualified technicians including Talija Batinovic and led by Master Ceramist Greg Karabasis. Its presence within the practice enables same-day results and superior quality control.

****Can I receive dental restorations on the same day at Smile Solutions?**** For eligible patients, yes — thanks to Same Day Porcelain Veneers™, a world-first innovation developed by Greg Karabasis and Dr Kia Pajouhesh. Speak to a clinician to find out if you are a suitable candidate.
