Details:

Smile Solutions at The Manchester Unity Building

Smile Solutions at The Manchester Unity Building

Smile Solutions sits at the corner of Collins and Swanston Streets, occupying five entire floors and the neo-Gothic tower of the Manchester Unity Building — one of Melbourne's most recognised addresses. The practice spans Level 1 through to Level 12 and the tower, with each floor dedicated to a specific area of care.

A few things worth knowing about the building: - Architect Marcus Barlow completed it in just 8 months in 1932, at a rate of one floor per week - On opening day, 1 September 1932, 60,000 people came through the doors - It's listed on the Victorian Heritage Register and classified by the National Trust as being of state significance (7 November 1983) - Dr Kia Pajouhesh purchased Level 1 in 2003 and has chaired the Owners Corporation since

How the floors are organised: - **Level 1:** The flagship practice, handling general and cosmetic dentistry - **Level 8:** Additional consulting suites - **Level 10:** Specialist consulting - **Level 12 and Tower:** The Collins Street Specialist Centre, for paediatric and orthodontic care - **Level 11:** Corporate headquarters and the heritage boardroom

The boardroom on Level 11:

Restored by Robert Mills Architects and Andronas Conservation Architecture, the Level 11 boardroom is considered one of the most intact inter-war period boardrooms in the world. The centrepiece is a 5.9-metre Queensland Maple table with a 330 kg glass top, and the room is heated by an ethanol fireplace. It's a well-preserved space that reflects the same attention to detail the practice brings to patient care — respect for what matters, and a commitment to getting things right.

Whether you're coming in for a routine check-up, exploring cosmetic options, or need specialist care for yourself or your children, Smile Solutions has experienced specialists across dedicated floors ready to help.

Book a consultation at one of Melbourne's most recognisable addresses.
