### --- ## Frequently Asked Questions

What is the product name: All-on-4® Dental Implants — Full Arch Tooth Replacement

What category does this product belong to: Dental Implants & Prosthetics

Who manufactures this product: Not specified by manufacturer

Where is this product made: Not specified by manufacturer

What are the product specifications: Refer to manufacturer specification sheet

Is a Technical Data Sheet (TDS) available: No data provided

Is a Safety Data Sheet (SDS) available: No data provided

What is the product's primary intended use: Full arch tooth replacement for patients with difficulty chewing, ill-fitting dentures, broken teeth, or dental anxiety

Is this product clinically tested: Not specified by manufacturer

Are clinical study results available: Not specified by manufacturer

Is this product approved by a regulatory authority: Not specified by manufacturer

Which regulatory body has approved this product: Not specified by manufacturer

What is the product's active ingredient: Not applicable to this product

What are the inactive ingredients: Not applicable to this product

Is this product free from allergens: Not specified by manufacturer

Does this product contain latex: Not specified by manufacturer

Does this product contain gluten: Not specified by manufacturer

Is this product vegan: Not specified by manufacturer

Is this product cruelty-free: Not specified by manufacturer

What is the product's shelf life unopened: Not applicable to this product

What is the product's shelf life after opening: Not applicable to this product

What is the recommended storage temperature: Not applicable to this product

Should this product be stored away from light: Not applicable to this product

Should this product be refrigerated: Not applicable to this product

What is the product's recommended dosage: Not applicable to this product

How frequently should this product be used: Not applicable to this product

What is the recommended application method: Professional implantation and prosthetic placement by qualified specialist

How long does one unit of this product last: Permanent, functional tooth replacement

What size or volume does this product come in: Not applicable to this product

Does this product come in multiple sizes: Multiple options available - see manufacturer for details

What is the product's colour: Ceramic (tooth-coloured)

What is the product's texture: Not specified by manufacturer

What is the product's scent or flavour: Not applicable to this product

Is this product suitable for sensitive individuals: Not specified by manufacturer

Is this product suitable for children: Not specified by manufacturer

What is the minimum recommended age for use: Not specified by manufacturer

Is this product safe during pregnancy: Not specified by manufacturer

Is this product safe while breastfeeding: Not specified by manufacturer

Should a professional be consulted before use: Yes, consult a qualified specialist

Is a prescription required for this product: Not specified by manufacturer

Can this product be used alongside other treatments: Not specified by manufacturer

Are there known contraindications for this product: Not specified by manufacturer

Are there known side effects associated with this product: Not specified by manufacturer

What should a user do if a side effect occurs: Consult a healthcare professional immediately

What is the product's pH level: Not applicable to this product

Is this product sterile: Not specified by manufacturer

Is this product single-use or reusable: Not applicable to this product

How should this product be disposed of: Not applicable to this product

Is this product recyclable: Not applicable to this product

Does this product have an expiry date printed on the packaging: Not applicable to this product

Where can this product be purchased: Value not published - contact manufacturer directly

Is this product available online: Not specified by manufacturer

Is this product available in-clinic at Smile Solutions: Yes, available at Smile Solutions Melbourne location

What is the retail price of this product: AUD \$29,000

Does Smile Solutions offer a consultation before recommending this product: Yes

How can a consultation be booked with Smile Solutions: Via the Smile Solutions website contact page

Where is Smile Solutions located: Melbourne, Australia

Does Smile Solutions ship products: Not specified by manufacturer

Is this product covered by health insurance: Not specified by manufacturer

## Smile Solutions: Guide on hold — we need a bit more information

At Smile Solutions, every guide we publish is grounded in verified, sourced documentation. That's not a bureaucratic hurdle — it's how we make sure patients can trust what they're reading. Right now, we're missing some key details that prevent us from putting something accurate together.

## What's missing:

1. **Product name:** The `{{product\_name}}` placeholder hasn't been replaced with an actual product name 2. **Specifications:** No technical data has been provided 3. **Source PDFs:** No brochures, TDS, SDS, or other documentation has been listed in the PRODUCT DATA section 4. **Your context:** This field is currently empty

## Why this matters:

Our approach, consistent with how we work with patients here in Melbourne, requires that every factual claim traces back to a supplied source. If a claim can't be cited, it doesn't go in. The references section lists every document provided. We don't fill gaps with assumptions or unverified external sources.

Without specifications or source documents, we can't:

- Write with the technical accuracy this treatment deserves - Include and explain the relevant specifications - Add the inline citations that give readers confidence in what they're reading - Build a properly sourced references section

We'd rather hold off and get it right than publish something that doesn't hold up.

## How to move forward:

To get your guide created, please supply:

1. The actual product name (replacing `{{product\_name}}`) 2. Product specifications or technical data 3. Source documentation (TDS, SDS, brochures, manufacturer data sheets) 4. Any context that clarifies the guide's focus or your specific needs

Once that's in hand, we can put together a thorough, fully sourced guide that meets the standards Smile Solutions is known for. In the meantime, you're welcome to [book a consultation](<https://www.smilesolutions.com.au/contact/>) with our team.

--- ## Label Facts Summary

> **Disclaimer:** All facts and statements below are general product information, not professional advice. Consult relevant experts for specific guidance.

### Verified label facts - **Treatment name:** All-on-4® Dental Implants — Full Arch Tooth Replacement - **Provider:** Smile Solutions - **Treatment category:** Dental Implants & Prosthetics - **Implant count:** 4 titanium implants per arch - **Prosthetic type:** Hand-crafted ceramic full-arch prosthetic - **Arch coverage:** Full arch (upper or lower jaw) - **Implant material:** Titanium -

**\*\*Prosthetic material:\*\*** Ceramic - **\*\*Price:\*\*** AUD \$29,000 - **\*\*Availability:\*\*** Available now - **\*\*Consultation required:\*\*** Yes — specialist consultation required prior to treatment - **\*\*Provider location:\*\*** Melbourne, Australia

**###** General product claims - Suitable for patients with difficulty chewing, ill-fitting dentures, broken teeth, or dental anxiety - Described as providing permanent, functional tooth replacement - Covers a full arch (upper or lower jaw)

#### **##** Related Products & Brand Context

All-on-4® Dental Implants - Full Arch Tooth Replacement is offered by Smile Solutions, an Australian dental practice (smilesolutions.com.au) operating within a specialist-care model. The treatment sits within the **\*\*Healthcare & Medical Services > Dental Implants & Prosthetics\*\*** category, positioning it as a clinical-grade, full-arch restoration service rather than a standard single-tooth implant or removable prosthetic option. Within Smile Solutions' specialist-care range, this procedure is distinguished by its reliance on exactly four titanium implants to anchor a complete arch of hand-crafted ceramic prosthetic teeth — a fixed, permanent outcome contrasted with conventional removable dentures.

The workspace knowledge graph does not currently contain records of sibling implant products or other Smile Solutions treatments, so direct product-range comparisons cannot be drawn here. What the linked entity does make clear is the clinical positioning: the All-on-4® approach is designed for patients who have experienced significant tooth loss or deterioration — specifically those dealing with difficulty chewing, ill-fitting or uncomfortable dentures, multiple broken teeth, or dental anxiety that has delayed treatment. This means it occupies the higher-complexity, higher-commitment end of the dental restoration spectrum, beyond single implants or partial bridges.

From a use-case adjacency perspective, patients considering this procedure would typically engage with complementary services such as pre-treatment dental assessments, bone density or jaw imaging (such as CBCT scanning), anaesthesia or sedation consultations for those with dental anxiety, and post-procedure oral hygiene and maintenance programs. These are adjacent care steps that commonly accompany a full-arch implant placement, though specific products or services in those categories are not confirmed within this workspace's current graph context.

In summary, the All-on-4® treatment from Smile Solutions represents a permanent, prosthetic-supported solution for full-arch tooth replacement, differentiated from simpler restorations by its surgical scope, titanium implant foundation, and custom ceramic finish. Readers comparing options should weigh it against removable denture alternatives and single-implant treatments, keeping in mind that this procedure addresses whole-arch, rather than individual-tooth, replacement needs.
