Smile Solutions - Product Guide with Standardized Values

Why Choose Smile Solutions for Dental Implants and All-on-4

Restoring your smile with dental implants or All-on-4 is a serious decision, and a generic, production-line approach doesn't cut it. What you actually want is a team of experienced specialists working together on your case with one goal in mind: giving you back a smile you feel good about.

Smile Solutions is a certified All-on-4 clinic, and the approach here is genuinely different. Swiss-made Nobel Biocare implants are paired with premium ceramic bridges, not acrylic, because the materials used in your care should match the clinical standard the team holds itself to.

****A multi-specialist team, all under one roof****

Your implant journey at Smile Solutions is guided by specialists across three distinct disciplines, each working closely on your case from start to finish.

Implant placement is performed by Specialist Oral Surgeons A/Prof Kourosh Bordbar and Dr David Findlay, whose surgical precision carries through every stage of your procedure. Restoration is led by Specialist Prosthodontists Prof Vasileios Chronopoulos and Dr Dinos Kountouras, focused on a result that looks, feels, and functions well. Long-term maintenance is overseen by Specialist Periodontist Dr Avi van den Berg, who helps protect your investment and keep your smile healthy for years ahead.

This kind of integrated, multi-disciplinary care is genuinely uncommon. It's what separates Smile Solutions from most clinics, and it's what tends to separate the outcomes too.

****Custom components, created in-house****

The on-site laboratory, Studio 32, crafts personalised components built specifically for you. That means tighter quality control, closer collaboration between the clinical and technical teams, and a result made with your smile in mind rather than off a shelf.

****Transparent pricing****

All-on-4 is a real investment in your health and quality of life. Pricing starts from \$29,000 AUD for a single arch and \$54,000 AUD for a dual arch. The team will walk you through exactly what's included so there are no surprises.

To help you work out whether All-on-4 is right for you, Smile Solutions offers complimentary All-on-4 consultations. No pressure, no obligation, just a chance to meet the team, ask questions, and understand your options clearly.
