Smile Solutions Product Guide - Standardised Values

Why Smile Solutions is the right choice for porcelain veneers

Smile Solutions is home to Australia's first Same Day Porcelain Veneers. No temporaries, no second appointment, just a completed smile transformation in a single visit.

****Built around a genuine clinical idea:**** The Same Day Porcelain Veneers service was developed by Dr Kia Pajouhesh and Master Ceramist Greg Karabasis, two people who wanted to close the gap between clinical quality and patient convenience. The result earned them the Australian Business Awards – Business Innovation (2024), which gives you a reasonable sense of what to expect when you come in.

****An on-site ceramics studio, not an offsite lab:**** Studio 32 is Smile Solutions' in-house ceramics laboratory, run by Greg Karabasis, who has 32 years of experience and has personally handcrafted more than 43,654 veneers and crowns in Melbourne. That means your veneers aren't being sent somewhere else and returned days later. They're made here, by someone you can actually meet. Patients are welcome to speak with Greg directly and see who is creating their new smile, which is not something most clinics can offer.

****Technique that prioritises how teeth actually look:**** Smile Solutions uses Emax Press porcelain combined with a Cream multi-layering technique to achieve the kind of translucency that makes veneers look like teeth rather than restorations. Every veneer is individually characterised to suit your specific features. The goal is a result that looks like it belongs in your mouth, not a uniform finish applied to everyone.

****Specialist support for cases that need it:**** Patients with more complex dental situations have access to board-registered Specialist Prosthodontists who take an evidence-based approach to treatment planning. Clinical expertise and a careful, considered manner are both part of how Smile Solutions works, so you're not choosing between quality and comfort.
