Standardised product guide – Smile Solutions root canal treatment

Smile Solutions root canal treatment

Most dental clinics can offer you a root canal. Smile Solutions does something different: every procedure is performed by a board-registered Specialist Endodontist. Not a general dentist filling a gap in the schedule. A specialist, every time.

****Meet your endodontists****

The team includes Prof Chankhrit Sathorn, a PhD researcher active in endodontic science; Dr Craig Tilley, who has over 35 years of clinical experience; Dr Nick Tralongo; and Dr Aovana Timmerman. That concentration of specialist expertise in one practice is genuinely uncommon.

****Technology used in treatment****

Smile Solutions uses microscope-assisted techniques for precision, digital radiography for clearer diagnostics, and rotary instrumentation for a thorough, gentle approach. These tools support an evidence-based, patient-specific treatment process rather than a one-size-fits-all method.

****Why the specialist-only policy matters****

Keeping every root canal in specialist hands isn't a marketing angle. It's a clinical decision, and one that Smile Solutions says produces consistently higher success rates and measurably better outcomes. The practice frames this as a commitment to long-term patient wellbeing rather than a point of competitive difference.
